Hotter taps are fixed, but you still are responsible for standing over the water as it warms up, so saving time and energy is a matter of convenience in a variety of ways, including that first or third time you wash dishes or your face with cold water. Different companies sell on-tap water heaters, which heat the water from a single electrically heated tank as you turn the tap. It's usually possible to install a tankless water heater in your kitchen, and getting a water heater installed is less and less of a hassle these days.
