Statistics for Kids Scott

Chamberlin, 2021-09-23 Perhaps the most useful and neglected content area of mathematics is statistics especially for students in Grades 4-6. Couple that fact with the notion that mathematical modeling is an increasing emphasis in many standards such as the Common Core State Standards for Mathematics and the NCTM standards and the necessity for this topic is overdue. In this book teachers will facilitate learning using model eliciting activities (MEAs) problem solving tasks created by mathematics educators to encourage students to investigate concepts in mathematics through the creation of mathematical models. Students will explore statistical concepts including trends, spread of data, standard deviation, variability, correlation, sampling and more, all of which are designed around topics of interest to students. Grades 4-6
Math Logic Mysteries Marilynn L. Rapp Buxton, 2021-09-03 Students love trying to solve challenging puzzles. So why not build and review their math skills while they're having fun? Math Logic Mysteries requires students to complete math problems and use reasoning to unlock the clues needed to solve matrix-based logic problems. Mathematical skills covered include measurement, number operations, geometry, probability, fractions, decimals, percentages, and algebra. This book includes a detailed how-to section for teaching logic puzzles and an in-depth answer key so students can understand the thinking process behind each solution. After doing these fun and challenging puzzles, your students will ask for more Math Logic Mysteries. Grades 5-8

Real Life Math Mysteries Marya Washington Tyler, 2021-10-03 Zookeeper, horse stable owner, archaeologist, lawyer, pilot, fireman, newspaper editor, dairy farmer, arson detective—these are just a few of the real people who, in their own words, share their own daily encounters with mathematics. How much lettuce does the Pizza Hut manager need to order for next week? How many rose bushes can a gardener fit around a wading pool? How many fire hoses will be needed to extinguish the fire? Your students will be amazed at the real-life math faced by truck drivers, disc jockeys, farmers, and car mechanics. Real Life Math Mysteries introduces students to math in the real world through a series of problems drawn from a vast array of community leaders, business professionals, and city officials. The problems are designed to stimulate students' creative thinking and teach the value of math in a real-world setting. Each concise and clear problem is provided on a blackline master and includes problem-solving suggestions for students with a comprehensive answer key. The problems are tied to the guidelines for math instruction from the National Council of Teachers of Mathematics. This book will get students thinking.
