Broadening Our Knowledge on Cluster Evolution Dirk Fornahl, Robert Hassink, Max-Peter Menzel, 2018-02-02 Although clusters are regarded as important elements in economic development the strong focus in the literature on the way clusters function is contrasted with a disregard for their evolutionary development how clusters actually become clusters how and why they decline and how they shift into new fields and transform over time Although recently new cluster life cycle approaches emerged both empirical evidence and theoretical contributions on this topic are still limited This book therefore contributes to broadening our knowledge on the life cycle and evolution of clusters both empirically and theoretically It contains chapters on inter firm relations as drivers of cluster transformation as well as chapters on the heterogeneity of firms and firm capabilities during cluster evolution and on the role of institutions in stimulating the emergence and growth of clusters Case studies stem from different industries and technologies such as biogas film and television new media and medical technologies and from different countries such as Sweden Austria Switzerland and South Korea All chapters underline that cluster evolution does not only depend on internal dynamics but that external relations are an integral part of cluster dynamics This book was previously published as a special issue of *European Planning Studies*

Unfolding Cluster Evolution Fiorenza Belussi, Jose Luis Hervás-Oliver, 2016-08-05 Various theories have been put forward as to why business and industry develops in clusters and despite good work being carried out on path dependence and dynamics this is still very much an emerging topic in the social sciences To date no overarching theoretical framework has been developed to show how clusters evolve Unfolding Cluster Evolution aims to address this gap by presenting theoretical and empirical research on the geography of innovation This contributed volume seeks to shed light on the understanding of clusters and its dynamic evolution The book provides evidence to suggest that traditional perspectives from evolutionary economic geography need to be wedded to management thinking in order to reach this point Bringing together thinking from a range of disciplines and countries across

Europe this book explores a wide range of topics from the capability approach to network dynamics to multinational corporations to firm entry and exit and social capital This book will be of interest to policy makers and students of urban studies economic geography and planning and development

Handbook on the Geographies of Innovation Richard Shearmur, Christophe Carrincazeaux, David Doloreux, 2016-11-25 The geography of innovation is changing Firstly it is increasingly understood that innovative firms and organizations exhibit a wide variety of strategies each differently attuned to diverse geographic contexts Secondly and concomitantly the idea that cities clusters and physical proximity are essential for innovation is evolving under the weight of new theorizing and empirical evidence The aim of this handbook is to break with the many ideas and concepts that emerged during the course of the 1980s and 1990s and to fully take into account the new reality of the internet mobile communication technologies personal mobility and globalization The handbook gathers a new generation of ideas and authors to contribute to the debate providing an empirically grounded critical appraisal of the prevailing knowledge on the geography of innovation The 28 original chapters written by a diverse range of scholars with widely differing views present fresh empirical evidence and new perspectives relating to how innovation plays out across space in an age where mobility has increased information is ubiquitous and globalisation has been realised Overall the dialogue between existing theory and new possibilities provides a unique and challenging appraisal of the connection between innovation agglomeration and space Offering cutting edge ideas in an accessible format this will be an ideal resource for students and scholars of economic geography and innovation studies The empirical evidence and analysis will also be of great value for policymakers and government officials Contributors include B T Asheim H W Aslesen A Bain P A Balland N Bradford A Bramwell C Brennan Horley S Breschi C Carraincazeaux C Chaminade R Comunian C De Fuentes D Doloreux D Eckert A Faggian M Ferru R D Fitjar K Flanagan C Gibson M Grillitsch M Grossetti G Harirchi F Huber A Isaksen S Jewel J Karlsen N Komninos J L Klein N Lee F Lissoni M Maisonobe J Mattes P McCann C T Noumedem R Ortega Argil s M Plechero A Rallet A Rodriguez Pose R Shearmur H L Smith B Spigel J Tallec E Tranos D G Tremblay F T dtling M Tripp E Uyarra C Yang C Wilkie D A Wolfe
