Kohler Co. offers silencers rated for hospital, critical, residential, and industrial applications and stainless steel flexible exhaust connectors for unhouseed generator sets. The accessories described in this spec sheet apply to open units unless otherwise stated. These silencers withstand exhaust flow pressure and temperature without creating excessive engine backpressure.

| Silencer Type | Noise Reduction dB(A) | Ambient Noise Level | Silencing Requirement |
|---------------|-----------------------|---------------------|-----------------------|
| Hospital      | 32-42                 | Low                 | Very High             |
| Critical      | 25-35                 | Low                 | High                  |
| Residential   | 18-25                 | Low-Medium          | Medium                |
| Industrial    | 12-18                 | Medium-High         | Low-Medium            |

#### Silencer and Exhaust System Selection

Select the silencer based on the required degree of exhaust noise reduction using the four silencer ratings in the table above. In addition, select the silencer inlet/outlet type using the legend descriptions.

Note: Some generator set models may not offer all exhaust system combinations.

Use the illustrations on the following pages to select the available silencer type and exhaust system configuration best suited for your application. Consult with your authorized distributor/dealer for silencer and component kit numbers and for silencer dimensions.

#### Backpressure Considerations

Refer to the generator set spec sheet to determine the maximum allowable exhaust backpressure. Add the backpressure produced by the silencer and exhaust piping together to determine the total exhaust system backpressure. Contact an authorized distributor/dealer to calculate backpressure in the exhaust piping. Do not exceed the maximum allowable backpressure.
