The comprehensive Learner's Book includes an expanded contents page indicating the CAPS coverage required for each strand, a mind map at the beginning of each module that gives an overview of the contents of that module, activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning, a review at the end of each unit that provides for consolidation of learning, case studies that link science to real life situations and present balanced views on sensitive issues, information boxes providing interesting additional information, and Note boxes that bring important information to the learner's attention.

Educational Technology and Pedagogic Encounters

Yusef Waghid, 2016-07-15 This book looks at some of the underlying theories of educational technology means and ways in which this technology is guided in practice. The authors are intent on producing ends that prepare students to undertake new analyses and evaluations that can result in new possibilities for democratic action. Emphasis is on their understanding of and position within educational technology as opposed to using or applying educational technology. The work is not written from the point of view that their embeddedness within educational technology has a utilitarian end in mind but rather that their situatedness within educational technology a practice in itself leaves open possibilities for new ways of understanding democratic education. This book is organised into six interrelated themes that work towards the cultivation of educational technology as a human practice which guides pedagogic encounters on the basis of taking risks in relation to which the unexpected/unimaginable is always possible.

Creating Effective Teaching and Learning Spaces: Shaping Futures and Envisioning Unity in Diversity and Transformation Zilungile Lungi Sosibo, Eunice Ivala, 2021-09-07

Higher education in post-apartheid South Africa was always likely to attract academic interest and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds. Using examples from higher education institutions across the Southern African Developing Community (SADC) region, this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions and provides concrete recommendations for the future. The book is sure to appeal to academics from a variety of disciplines from African, African American and ethnic studies to education and sociology. It will be of particular interest to teacher trainers, administrators and policy makers working in higher education and anyone else with a stake in managing cultural diversity in education.
