## jBPM5 - Overview

JBPM stands for "Java Business Process Management". It is a JBoss product which is an open source framework. Before moving further, let us first define a business process.

### What is a Business Process?

By definition, a business process is a sequence of tasks that takes place in a repeatable order, executed by humans and/or systems to achieve a business goal. It describes the order (using a flowchart) in which a series of steps needs to be executed. A business process can significantly improve the visibility and agility of a business logic.

Let us take an example. The following screenshot depicts a workflow/flowchart that most IT professionals can relate to. It is a common process that is followed in most organizations to appraise the employees based on their performance.

The process takes place in the following order –

- Employees self-evaluate themselves and submit the report to their Project Managers.
- Your performance is then evaluated by the Project Manager and the HR Manager. Based on the evaluation, they give the employees a rating.
- The final rating or performance feedback is then relayed back to the employees.

This process is applicable for almost all the employees and hence, it is a very good example to understand a business process. It is a sequence of tasks and it happens in a particular order.

## **Jbpm 5 User Guide:**

**Mastering jBPM6** Simone Fiorini, Arun V Gopalakrishnan, 2015-06-25 This book provides a complete understanding of the jBPM technology stack. It starts with an introduction to the world of business process management systems, the problem domain addressed by jBPM, explores the main use cases that can be addressed by business process management systems, and illustrates the main design patterns. It takes you through the details of the architecture and available out of the box provisions for customizing, extending, and integrating the features of jBPM to meet the requirements of your application. Moreover, this book will empower you with the knowledge to integrate jBPM with enterprise architecture, debug through the source code of jBPM, and utilize the flexibility provided by a heavily modular system. Finally, it introduces you to the provisions available for a jBPM based application to put the non-functional characteristics of the system, which are of great importance when we deploy our application in production. The book helps you in putting the knowledge at work by providing you with a lot of ready-to-use examples, both basic and advanced ones. *JBoss Tools 3 Developers Guide* Anghel Leonard, 2009-04-17 Develop JSF, Struts, Seam, Hibernate, jBPM, ESB, web services, and portal applications faster than ever using JBoss Tools for Eclipse and the JBoss Application Server. *New Horizons in Web Based Learning -- ICWL 2010 Workshops* Xiangfeng Luo, Yiwei Cao, Bo Yang, Jianxun Liu, Feiyue Ye, 2011-04-25 This book constitutes the thoroughly refereed post-workshop proceedings of the 9th International Conference on Web Based Learning ICWL 2010 held in Shanghai, China, in December 2010. The 36 revised full papers and 8 short papers presented were carefully reviewed and selected from 192 submissions. They deal with topics such as e-learning platforms and tools, technology-enhanced learning, Web-based learning for oriental languages, mobile situated e-learning, learning resource deployment, organization and management, design model and framework of e-learning systems, e-learning metadata and standards, collaborative learning, and game-based learning, as well as practice and experience sharing and pedagogical issues. *FORMS/FORMAT 2010* Eckehard Schnieder, Geza Tarnai, 2011-02-10 Complexity in automation and safety systems in railway, as well as automotive applications, are dominated more and more by formal description means, methods, and tools. Formal techniques provide, next to correctness and integrity checkups, especially for safety-relevant systems, the possibility to model, prove, simulate, and check the specification of the system, as well as to generate the system implementations. Requirements of the CENELEC and IEC Standards on formal techniques, particularly with regard to the handling of safety analysis, are to be treated in FORMS/FORMAT 2010. The main focus lies on topics facing formal techniques for railway applications and intelligent transportation systems, as well as for automotive applications. Gained findings, experiences, and also difficulties associated with the handling of the subject matter, as well as description means and tools, are to be shown. *Business Process Management Workshops* Fabiana Fournier, Jan Mendling, 2015-04-11 This book constitutes the refereed proceedings of ten international workshops held in Eindhoven, The Netherlands, in conjunction with the 12th International Conference on Business Process Management BPM 2014, in
