Workman, Susan M. Abmayr, 2013-12-04 While there has been an increasing number of books on various aspects of epigenetics there has been a gap over the years in books that provide a comprehensive understanding of the fundamentals of chromatin Chromatin is the combination of DNA and proteins that make up the genetic material of chromosomes Its primary function is to package DNA to fit into the cell to strengthen the DNA to prevent damage to allow mitosis and meiosis and to

control the expression of genes and DNA replication The audience for this book is mainly newly established scientists and graduate students Rather than going into the more specific areas of recent research on chromatin the chapters in this book give a strong updated groundwork about the topic Some the fundamentals that this book will cover include the structure of chromatin and biochemistry and the enzyme complexes that manage it *Motor*, 1958 The Biomarkers, Mechanism, and Therapeutic Strategies of Cancer Immunotherapy Resistance Mou Peng, Xin Jin, Yunliang Gao ,Xiaoxin Ren,2025-07-30 Over the decades cancer immunotherapy has been a burgeoning science in medicine and an established pillar of therapeutic options for diverse cancer types Leading the way to success is mainly the discovery and development of immune checkpoint inhibitors ICIs and chimeric antigen receptor CAR T cell based therapies Under immunotherapy a portion of cancer patients enables to achieve a significant and durable remission with a longer survival time particularly in those with lung cancer melanoma genitourinary cancer etc However striking disparities still exist in the effectiveness of anticancer immunotherapy and cause a great challenge to select appropriate candidates A large part of cancer patients presents limited or no response to immunotherapy mainly attributable to immunotherapy resistance Despite of great strides already made the exact mechanism underlying immunotherapy resistance is still enigmatic Immunotherapy resistance is extremely complex and involves voluminous aspects such as tumor intrinsic factors aberrant expression of tumor antigens alterations of signaling pathways etc tumor extrinsic factors local tumor microenvironment etc and host related factors gender age etc More efforts should be made to characterize the underlying mechanism and uncover robust targets for a better response rate

Clearly this Section is delivering a useful resource to the scientific and medical research community. The scope of the Specialty Section Neuropharmacology is deliberately broad. We encourage submission of high quality and impactful papers in the field of neuropharmacology along the full length of the translational escalator from cellular and molecular investigations to clinical trials. I believe this is a real strength of the Section and helps attract a diverse readership that builds the stakeholder network to promote further engagement of the Section with the research community. I have no doubt that this has contributed to the growth of the Section with submissions and accepted papers displaying 10 year 2009-2019 compound annual growth rates CAGRs of 58% and 78% respectively. Vitaly high quality scientific rigour and impact are fundamental to a paper being accepted and this inevitably leads to a relatively high level of rejection but the transparency of the review process means a fair decision is reached. Essential for the handling and considered review of submitted papers the Specialty Section Neuropharmacology has a dynamic cohort of Associate Editors that have been selected carefully. 81 at the time of writing that represent the full spectrum of neuropharmacology as well as being widespread geographically around the globe. The Associate Editors are supported by nearly 500 Review Editors that ensures informed review indeed the relatively open and interactive review process often adds considerably to the accepted version of the paper. As we celebrate the success of *Frontiers in Pharmacology* and the Specialty Section Neuropharmacology with this eBook we must also recognise and be thankful for the hard work and dedication of those in the Editorial Office their enthusiasm and willingness to help is outstanding and they form an integral component of the overall team that delivers the success. I look forward to further success for the Specialty Section Neuropharmacology. Happy reading.
