Jcb 530 Manual:

Spine and Joint Articulation for Manual Therapists Giles Gyer, Jimmy Michael, Ben Calvert-Painter, 2016-09-01 The book focuses on the practical application of articulation and mobilisation techniques with clear explanations and visual support of the techniques. Techniques are described for all body regions. Most other books for therapists include only one chapter on these important techniques. This book covers a variety of best practise techniques for all areas of the body. Examples are given to show how to adapt the techniques with the patient in different positions. It also addresses the use of these techniques on children, the elderly and pregnant women. The mechanisms of each technique are explained with reference to the related anatomy and physiology. Information is also given to help the therapist use the techniques safely for both themselves and their patients by adapting their own stance and posture to get maximum effect with minimum effort.

Manual on Image-Guided Brachytherapy of Inner Organs Konrad Mohnike, Jens Ricke, Stefanie Corradini, 2021-08-05 This book provides a comprehensive insight into this special form of image guided interventional therapy and its indications. It begins by introducing the fundamental principles of radiotherapy, the most up to date guidelines and the interdisciplinary aspects of the technique and then expands to more practical aspects such as therapy planning, indications and the use of the technique for certain tumor types including liver metastases, rare tumors, cerebral malignancies and prostate tumors. Written and edited by pioneers in this technique, the chapter's outline results and numerous illustrated case studies from the daily routine of daily clinical practice, providing an insightful guidance to this relatively new but growing method. This is an indispensable guide for oncologists, radiation therapists and radiologists but also general practitioners and all other specialties which have an oncological focus.
