lives cacti are boring spiny plants Also cactus plants have long been the subject of a superstition that any house which has
cactus growing in it is going to be filled up with strife and trouble and arguments That is because of the spines of the cactus
which are known as spikes promote ill feeling There is something so odd about a cactus plant that it is often difficult until you
grow them yourself to believe that these really belong to the plant kingdom Historically how many pioneer explorers of the
desert areas in America saw them in the twilight and thought stories of monsters with their arms outstretched and no heads
who turned into plants in the desert in the morning No wonder these giants which can grow up to 63 feet have always been
the subject for legends Even today most of us are told tales about the cactus which many of us half believe Some of us have
heard that cacti are poisonous Other people are going to tell us that cacti flower only once in 100 years and only when the
area is subjected to rain The first tale is totally and true The second tale is also untrue because certain species of cacti will
flower almost every year if given proper cultivation and care Cactuses also known as cacti belong to the family Opuntiaceae
Many of these plant varieties have lost true leaves but they still have fluted and ribbed stems The stems store water and
many of the desert varieties have very short growing time periods Their periods of dormancy may be long because many
times they have to go without water and rainfall for years especially when they are growing in the Atacama Desert Cactus
