### Deep Learning Methods and Applications in Brain Imaging for the Diagnosis of Neurological and Psychiatric Disorders

Hao Zhang, Da Ma, Lei Wang, 2024-10-14 Brain imaging has been successfully used to generate image based biomarkers for various neurological and psychiatric disorders such as Alzheimer's and related dementias Parkinson's disease stroke traumatic brain injury brain tumors depression schizophrenia etc However accurate brain image based diagnosis at the individual level remains elusive and this applies to the diagnosis of neuropathological diseases as well as clinical syndromes In recent years deep learning techniques due to their ability to learn complex patterns from large amounts of data have had remarkable success in various fields such as computer vision and natural language processing Applying deep learning methods to brain imaging assisted diagnosis while promising is facing challenges such as insufficiently labeled data difficulty in interpreting diagnosis results variations in data acquisition in multi site projects integration of multimodal data clinical heterogeneity etc The goal of this research topic is to gather cutting edge research that showcases the application of deep learning methods in brain imaging for the diagnosis of neurological and psychiatric disorders We encourage submissions that demonstrate novel approaches to overcome various abovementioned difficulties and achieve more accurate reliable generalizable and interpretable diagnosis of neurological and psychiatric disorders in this field Novel Methods for

Tian, Chunxiao Guo, 2021-09-23 *Biomedical Image Analysis and Machine Learning Technologies: Applications and Techniques* Gonzalez, Fabio A., Romero, Eduardo, 2009-12-31 Medical images are at the base of many routine clinical decisions and their influence continues to increase in many fields of medicine Since the last decade computers have become an invaluable tool for supporting medical image acquisition processing organization and analysis Biomedical Image Analysis and Machine Learning Technologies Applications and Techniques provides a panorama of the current boundary between biomedical complexity coming from the medical image context and the multiple techniques which have been used for solving many of these problems This innovative publication serves as a leading industry reference as well as a source of creative ideas for applications of medical issues Medical Image Recognition, Segmentation and Parsing S. Kevin Zhou, 2015-12-11

This book describes the technical problems and solutions for automatically recognizing and parsing a medical image into multiple objects structures or anatomies It gives all the key methods including state of the art approaches based on machine learning for recognizing or detecting parsing or segmenting a cohort of anatomical structures from a medical image Written by top experts in Medical Imaging this book is ideal for university researchers and industry practitioners in medical imaging who want a complete reference on key methods algorithms and applications in medical image recognition segmentation and parsing of multiple objects Learn Research challenges and problems in medical image recognition segmentation and parsing of multiple objects Methods and theories for medical image recognition segmentation and parsing of multiple objects

Efficient and effective machine learning solutions based on big datasets Selected applications of medical image parsing using proven algorithms Provides a comprehensive overview of state of the art research on medical image recognition segmentation and parsing of multiple objects Presents efficient and effective approaches based on machine learning paradigms to leverage the anatomical context in the medical images best exemplified by large datasets Includes algorithms for recognizing and parsing of known anatomies for practical applications *Statistical model-based computational biomechanics: Applications in joints and internal organs* Emmanuel A. Audenaert, Tinashe E. M. Mutsvangwa, Bhushan Borotikar, Shireen Y. Elhabian, 2023-07-05 *Artificial Intelligence and Imaging for Oncology* Poonam Yadav, Zhimin Li, Yuxiang Zhou, 2025-02-18 Recent progress in artificial intelligence AI and advanced imaging techniques have brought about exciting diagnostic and therapeutic opportunities in oncology More and more state of the art CT PET and MRI imaging techniques are being applied to tumor imaging and new interdisciplinary field such as MR LINAC is booming We feel there is an urgent need to organize a Research Topic to highlight the application of AI and imaging for various oncology branches such as radiation therapy as we are witnessing an accelerated integration of imaging and therapy to improve the care of cancer patients Imaging has also been the backbone of the oncology world It is used for diagnosis as well as planning MRI has a superior soft tissue contrast but lacks the electron density information for the dose calculation alternative approaches use synthetic CT for dose calculation The development of the MRI guided system and online adaptation can be considered as the bridge between many specialties starting from learning about MRI safety by the therapy physicist to the use of AI for robust planning Active research is done to improve the images advanced MRI techniques Nuclear medicine and PET MRI synthetic images CBCT for dose calculation for clinical workflows However all these topics have a lot of room for exploration *Machine Learning and Decision Support in Stroke* Fabien Scalzo, David S. Liebeskind, 2020-07-09 Translational Applications of Neuroimaging Stavros Skouras, David M. A. Mehler, Amelie Haugg, 2024-04-04 Despite substantial progress in the development of neuroimaging methodologies translational applications of neuroimaging remain scarce This Research Topic invites article submissions that present promising neuroimaging applications and methods addressing critical needs for improving health outcomes These may include Original Research Clinical Trial Systematic Review or Methods articles that investigate neuroimaging metrics as outcome measures or in combination with neural perturbation techniques e g neurofeedback neurostimulation other translational applications e g guiding neurosurgery To foster debate we also welcome critical Review Opinion and Perspective articles that survey the field and its progress towards clinical utility **Overtreated** Shannon Brownlee, 2007-09-18 A critique of the modern day American health care system looks at the potential consequences of overtreatment revealing how modern medicine provides huge amounts of unnecessary care that is wasteful expensive and dangerous to the health of patients *Applied Radiology*, 2008 Each issue includes separate but continuously pagged sections called Nuclear medicine and Ultrasound *American Journal of Respiratory and Critical Care Medicine*, 2009
