

## Leica I, Model B, Leica Compur

(continued)

ber were made during the war for special purposes. They were awkward to use compared with the Model A. The Compur Leica was probably inspired by the Mifilmca microscope camera, which already existed, as a short term solution to the problem of lack of slow speeds. The body was similar to that of the Mifilmca with the addition of the viewfinder and accessory shoe. It has been suggested that the Compur Leica was an attempt to entice the more conservative user who was familiar with the Compur type shutter. Anyone who has ever tried to use a Compur Leica has soon found out that the conventional Leica with its focal plane shutter is much easier to handle.

### Characteristics

- Compur shutter on front of lens mount instead of focal plane shutter.
- Dial-set Compur from No. 5,701 in 1926 to No. 13,163 in 1929. The larger dial set speeds from 1 sec. to 1/300 and the smaller one selected 1, for instantaneous speeds, B or T.

Leica I Model B, No. 32745, with rim-set Compur shutter and square accessory shoe.

With lens in retracted position.

- Rim-set, new type Compur from No. 13,154 in 1928 to 50,711. Speeds from 1 sec. to 1/300, B and T.
- Exposure counter on top-plate where shutter speed dial would normally be.
- Mushroom shaped release button.
- Shutter not interlocked with film wind.
- Elmar lens, 5 cm, f/3.5, of type used by other manufacturers for Compur mounting.

### Variations

1. Similar minor variations in dial-set cameras as in contemporary Model A cameras, e.g.: dimple in mushroom release.
2. Accessory shoe changed from round to square about same time as change of shutter.

Leica I Model B, No. 40510, with rim-set Compur shutter and round accessory shoe. (Photo: John Wade)
