### Walks of Life

As India's poor pay a deadly price for the country's population growth and spiralling development, the launch of Emeralds for Elephants India 2011 was an urgent bid to save human lives and protect threatened wildlife. The project saw 10 of India's top designers create a special collection of emerald jewellery, to be auctioned at Sotheby's, at an exclusive event in the Taj Mahal Palace Hotel in Mumbai, India.

Behind the glamour of Emeralds for Elephants, there was the plight of a third of the world's poorest people. As India's natural landscape disappears, making way for new roads, housing and industry, people are often forced to live in the migration paths of animals, traditional routes that the animals have used for generations. This is intensifying the conflict between people and wildlife. The result is inevitable: 200 elephants were killed by humans last year, while 500 people were killed by elephants.

The World Land Trust, a UK based conservation charity, is working in partnership with the Wildlife Trust of India to create protected wildlife corridors connecting national parks and protected areas. The Emeralds for Elephants project saw the two charities team up with Gemfields, the leading coloured-gemstone mining company, to create wildlife corridors.

The Wildlife Trust of India also helps move people out of harm's way through voluntary relocation. The need for this was highlighted when, between October and March 2011, tigers killed seven people from villages settled within a migration route in Uttarakhand. The positive news is that, because of the tiger attacks, villagers are now in favour of moving away from the migration routes, and the local government and the Forest and Wildlife Departments gave their full permission for the Wildlife Trust of India to begin turning the area into a protected wildlife corridor.

Vivek Menon, Wildlife Trust of India's executive director, said: "You can't continue to let over a billion people live in such close proximity to 65 per cent of the world's largest tigers, 85 per cent of the elephants in Asia, and 90 per cent of the rhinos in Asia. These animals need space. I have only one solution: give them space."
