Today businesses must allow interaction with their customers partners and employees at more touch points and at a depth never thought previously. At the same time rapid advances in information technologies like business digitization cloud computing and Web 2.0 demand fundamental changes in the enterprises management practices. These changes have a drastic effect not only on IT and business but also on policies processes and people. Many companies therefore embark on enterprise wide transformation initiatives. The role of Enterprise Architecture EA is to architect and supervise this transformational journey.

Unfortunately today's EA is often a ponderous and detached exercise with most of the EA initiatives failing to create visible impact. The enterprises need an EA that is agile and responsive to business dynamics. Collaborative Enterprise Architecture provides the innovative solutions today's enterprises require informed by real world experiences and experts' insights. This book in its first part provides a systematic compendium of the current best practices in EA, analyzes current ways of doing EA and identifies its constraints and shortcomings. In the second part it leaves the beaten tracks of EA by introducing Lean Agile and Enterprise 2.0 concepts to the traditional EA methods. This blended approach to EA focuses on practical aspects with recommendations derived from real world experiences. A truly thought provoking and pragmatic guide to manage EA. Collaborative Enterprise Architecture effectively merges the long term oriented top down approach with pragmatic bottom up thinking and that way offers real solutions to businesses undergoing enterprise wide change. Covers the latest emerging technologies affecting business practice including digitization, cloud computing, agile software development and Web 2.0. Focuses on the practical implementation of EAM rather than theory with recommendations based on real world case studies. Addresses changing business demands and practices including Enterprise 2.0, open source, global sourcing and more. Takes an innovative approach to EAM merging standard top down and pragmatic bottom up strategies offering real solutions to businesses undergoing enterprise wide changes.
