

BALE-TRAK[®] MONITOR**A—Green light — GATE LATCHED**

This light or indicator indicates the gate is closed and latched. It also acts as a pilot light showing the monitor has full power.

IMPORTANT: Damage to gate or gate bracket can occur if only one side of gate is latched. Green light must be on before starting a bale. Hold tractor valve in closed position for 1 to 2 seconds after light comes on. Backhoe light after transport.

B—Yellow light — AUTOMATIC Tangle Watch

This light will start flashing when the bale is near its finished size. This allows time to even the bale up before the automatic tangle wrap starts.

When the tangle wrap starts to cycle, this light will go solid and stay solid until the tangle wrap returns to its home position. At this time, the light will return to flashing until the bale is ejected.

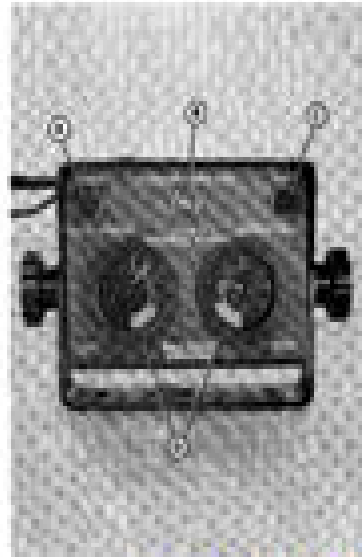

C—Red light and buzzer — OVERSIZE BALE

Light and buzzer on indicates the baler is filled to maximum capacity. Once immediately or damage may occur to baler. After stopping forward travel, the bale can be wrapped with tangle by pulling and releasing the manual control rope. This light should not come on during normal operation of the baler.

NOTE: When red light comes on, green light will go out.

(5—BALE) SHAPE GAUGES

Bale shape gauges show the shape of each end of the bale by measuring width in the two outside bales nearest the left-hand and right-hand side shafts. When the left-hand ball is light, the left-hand gauge will read high in the green area showing that side of baler is filled with hay. As the gauge falls in the green area or into the red area, it indicates that side of the baler needs hay to lighten the ball.
