Learning Automata Kumpati S. Narendra, Mandayam A.L. Thathachar, 2013-05-27 This self contained introductory text on the behavior of learning automata focuses on how a sequential decision maker with a finite number of choices responds in a random environment Topics include fixed structure automata variable structure stochastic automata convergence 0 and S models nonstationary environments interconnected automata and games and applications of learning automata A must for all students of stochastic algorithms this treatment is the work of two well known scientists and is suitable for a one semester graduate course in automata theory and stochastic algorithms This volume also provides a fine guide for independent study and a reference for students and professionals in operations research computer science artificial intelligence and robotics The authors have provided a new preface for this edition *Learning Automata* Kumpati S. Narendra, Mandayam A. L. Thathachar, 2012-12-19 This self contained introductory text on the behavior of learning automata focuses on how a sequential decision maker with a finite number of choices would respond in a random environment A must for all students of stochastic algorithms this treatment is the work of two well known scientists one of whom provides a new Introduction Reprint of the Prentice Hall Inc Englewood Cliffs New Jersey 1989 edition *Machine Learning Techniques for Gait Biometric Recognition* James Eric Mason, Issa Traoré, Isaac Woungang, 2016-02-04 This book focuses on how machine learning techniques can be used to analyze and make use of one particular category of behavioral biometrics known as the gait biometric A comprehensive Ground Reaction Force GRF based Gait Biometrics Recognition framework is proposed and validated by experiments In addition an in depth analysis of existing recognition techniques that are best suited for performing footstep GRF based person recognition is also proposed as well as a comparison of feature extractors normalizers and classifiers configurations that were never directly compared with one another in any previous GRF recognition research Finally a detailed theoretical overview of many existing machine learning techniques is presented leading to a proposal of two novel data processing techniques developed specifically for the purpose of gait biometric recognition using GRF This book introduces novel machine learning based temporal normalization techniques bridges research gaps concerning the effect of footwear and stepping speed on footstep GRF based person recognition provides detailed discussions of key research challenges and open research issues in gait biometrics recognition compares biometrics systems trained and tested with the same footwear against those trained and tested with different footwear *Stochastic Local Search - Methods, Models, Applications* Holger Hoos, 1999 To date stochastic local search SLS algorithms are among the standard methods for solving hard combinatorial problems from various areas of Artificial Intelligence and Operations Research Some of the most successful and powerful algorithms for prominent problems like SAT CSP or TSP are based on stochastic local search This work investigates various aspects of SLS algorithms in particular it focusses on modelling these algorithms empirically evaluating their performance characterising and improving their behaviour and understanding the factors which influence

their efficiency These issues are studied for the SAT problem in propositional logic as a primary application domain SAT has the advantage of being conceptually very simple which facilitates the design implementation and presentation of algorithms as well as their analysis However most of the methodology generalises easily to other combinatorial problems like CSP This Ph D thesis won the Best Dissertation Award 1999 Dissertationspreis of the German Informatics Society Gesellschaft für Informatik *Learning in Dynamic Noncooperative Multiagent Systems* Junling Hu,1999 *Bibliographic Guide to Computer Science* ,1990 *New Technical Books* New York Public Library,1990 Ordnungsparameter im handlungsorientierten Führungsmodell Christian Langer,2013-03-08 Auf der Grundlage individueller Wahrnehmungen und darauf basierender Handlungsentscheidungen entwickelt Christian Langer ein theoriegeleitetes Modell das er in einer computergestützten Multiagentensimulation implementiert und für Experimente zu individuellen und organisationalen Lern und Ordnungsprozessen einsetzt Whitaker's Books in Print ,1990 **The New Encyclopaedia Britannica: Macropaedia : Knowledge in depth** ,2003 *Bibliographic Index* ,1989 Whitaker's Book List ,1989 **The British National Bibliography** Arthur James Wells,2004 Learning Automata K. Najim,A.S. Poznyak,2014-06-28 Learning systems have made a significant impact on all areas of engineering problems They are attractive methods for solving many problems which are too complex highly non linear uncertain incomplete or non stationary and have subtle and interactive exchanges with the environment where they operate The main aim of the book is to give a systematic treatment of learning automata and to produce a guide to a wide variety of ideas and methods that can be used in learning systems including enough theoretical material to enable the user of the relevant techniques and concepts to understand why and how they can be used The book also contains the materials that are necessary for the understanding and development of learning automata for different purposes such as processes identification optimization and control Learning Automata Theory and Applications may be recommended as a reference for courses on learning automata modelling control and optimization The presentation is intended both for graduate students in control theory and statistics and for practising control engineers **New Topics in Learning Automata Theory and Applications** Norio Baba,1985 **Recent Advances in Learning Automata** Alireza Rezvanian,Ali Mohammad Saghiri,Seyed Mehdi Vahidipour,Mehdi Esnaashari,Mohammad Reza Meybodi,2018-01-17 This book collects recent theoretical advances and concrete applications of learning automata LAs in various areas of computer science presenting a broad treatment of the computer science field in a survey style Learning automata LAs have proven to be effective decision making agents especially within unknown stochastic environments The book starts with a brief explanation of LAs and their baseline variations It subsequently introduces readers to a number of recently developed complex structures used to supplement LAs and describes their steady state behaviors These complex structures have been developed because by design LAs are simple units used to perform simple tasks their full potential can only be tapped when several interconnected LAs cooperate to produce a group synergy In turn the next part of the book highlights a range of LA

based applications in diverse computer science domains from wireless sensor networks to peer to peer networks to complex social networks and finally to Petri nets The book accompanies the reader on a comprehensive journey starting from basic concepts continuing to recent theoretical findings and ending in the applications of LAs in problems from numerous research domains As such the book offers a valuable resource for all computer engineers scientists and students especially those whose work involves the reinforcement learning and artificial intelligence domains

Advances in Learning Automata and Intelligent Optimization Javidan Kazemi Kordestani,Mehdi Razapoor Mirsaleh,Alireza Rezvanian,Mohammad Reza Meybodi,2021 This book is devoted to the leading research in applying learning automaton LA and heuristics for solving benchmark and real world optimization problems The ever increasing application of the LA as a promising reinforcement learning technique in artificial intelligence makes it necessary to provide scholars scientists and engineers with a practical discussion on LA solutions for optimization The book starts with a brief introduction to LA models for optimization Afterward the research areas related to LA and optimization are addressed as bibliometric network analysis Then LA s application in behavior control in evolutionary computation and memetic models of object migration automata and cellular learning automata for solving NP hard problems are considered Next an overview of multi population methods for DOPs LA s application in dynamic optimization problems DOPs and the function evaluation management in evolutionary multi population for DOPs are discussed Highlighted benefits Presents the latest advances in learning automata based optimization approaches Addresses the memetic models of learning automata for solving NP hard problems Discusses the application of learning automata for behavior control in evolutionary computation in detail Gives the fundamental principles and analyses of the different concepts associated with multi population methods for dynamic optimization problems
