

Installation – Mechanical

Unit Isolation

There are two mounting methods that will minimize sound and vibration problems. They are the direct-mount method and the isolator-mount method.

Direct Mounting

The unit can be direct-mounted on an isolated concrete pad or on isolated concrete footings at each mounting location. Refer to [Figure 13](#) for unit operating weights. A mounting hole is provided in the base of the unit frame at each mounting location. Provide a means of securely anchoring the unit to the mounting surface. Level the unit carefully. Refer to "Unit Leveling."

Neoprene Isolators

Install the optional neoprene mounting isolators at each mounting location. Refer to [Figure 13](#) for isolator selection, placement and loading information. Isolators are identified by color and by the isolator part number.

Bolt the isolators to the mounting surface. Do not fully tighten the mounting bolts. Mount the unit on the isolators and install a 1/2" nut on each isolator positioning pin. Maximum isolator deflection should be approximately 1/4-inch. Level the unit carefully. Refer to "Unit Leveling." Now fully tighten isolator mounting bolts.

Unit Leveling

Before snugging down the mounting bolts, level the unit carefully. Check unit level end-to-end by placing a level on the top surface of the unit frame. Unit should be level to within 1/4-inch (6.35 mm) over its length. Place the level on the unit frame to check front-to-back level. Adjust to within 1/4" (35 mm) of level front-to-back. Use the adjustable spring isolators or shims to level the unit.

Water Piping

Thoroughly flush all water piping to the unit before making the final piping connections to the unit.

CAUTION Use Piping Strainers!

To prevent evaporator damage, pipe strainers must be installed in the water supplies to protect components from water born debris. Trane is not responsible for equipment-only-damage caused by water born debris.

CAUTION Proper Water Treatment!

The use of untreated or improperly treated water in a RTAA may result in scaling, erosion, corrosion, algae or slime. It is recommended that the services of a qualified water treatment specialist be engaged to determine what water treatment, if any, is required. Trane assumes no responsibility for equipment failures which result from untreated or improperly treated water, or saline or brackish water.
