As the demand for education at all levels has increased so have the models of meeting these increased demands for education. As in many other parts of the world, public education has expanded to serve large populations across the regions of Africa, the Caribbean, and the Middle East. Many nations in these regions have instituted mandates, policies, and frameworks intended to simultaneously increase access to public education opportunities as well as improve the quality of education provided and to address a wide populace. Because the increase in educational demand has occurred at all levels, these efforts often address various levels of education from early childhood through primary schooling, junior secondary, and secondary schooling, and into tertiary education. Efforts also have been made to increase participation in education by marginalized and/or special populations. The range of efforts is large, with some focusing on involving migrants, immigrants, refugees in primary education, while others aim at opening up choices at the university level. Recently, nations in the region have recognized the possibilities of digital learning; online learning, as cell phones and other widely used portable wireless devices have made it possible to sell the idea that one can learn from anywhere at any time. This widespread access to technology has made it possible for governments as well as private entities to expand learning opportunities even to populations previously unreached or to address difficult-to-reach sectors of the population. At the same time, the population itself has not only increased in numbers but in diversity. Maintaining quality through digital and other means of quick expansion of educational opportunities continues to be challenging, if not problematic.

Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East is Book IX of the series *Research on Education in Africa, the Caribbean, and the Middle East*. Chapters document, describe, and/or raise critical issues and/or questions resulting from government policies, mandates, and frameworks intended to make available public education to an ever-growing populace while at the same time being mindful of improving quality of education being available to an increasingly diverse populace.

This book aims to provide the reader with an understanding of the concept of the circular economy in relation to food supply chains. The current food supply chain system based upon the linear supply chain model is unquestionably unsustainable. Make use, dispose. The circular supply chain model, on the other hand, aims to keep resources in use for as long as possible while regenerating products/materials at the end of their service life. In short, reduce, reuse, recycle. This book puts forward the circular economy as an alternative to the traditional supply chain.
