**Transforming Theological Education** Perry Shaw, 2014-05-14 For several decades concern has been expressed about the need for greater integration and contextual significance in the curricular design of theological education. In addition, there has been a growing awareness of the role theological schools should play in strengthening the missional vision and practice of local churches. Since 2008 the Arab Baptist Theological Seminary in Lebanon has been engaged in an ongoing experiment in the design and implementation of an integrated and contextually driven curriculum. Drawing on lessons learned from this experience and from the wider discourse currently taking place in higher education, *Transforming Theological Education* provides theoretical foundations and practical principles for purposeful curriculum design as well as tools for integrated and contextually significant learning in the classroom.

**Handbook of Research on Inclusive Development for Remote Adjunct Faculty in Higher Education** Dailey-Hebert, Amber, Mandernach, B. Jean, Donnelly-Sallee, Emily, 2020-10-16 As the number of adjunct faculty teaching online courses remotely for their institutions continues to increase, so do the unique challenges they face, including issues of distance and isolation as well as problems pertaining to motivation, time, and compensation. Not only are these higher education faculty geographically isolated from each other and their colleagues at flagship campuses, but they also lack adequate institutional support and resources necessary to perform their roles. As institutions continue to rely heavily on this group of under-supported and under-trained instructors who teach the majority of online courses offered across the country, institutions need models and strategies to tap the expertise and perspectives of this group not only to improve teaching and learning in online programs but also to retain this critical talent pool. More consideration is needed to create institutional affinity and organizational commitment, build community, and create opportunities for remote adjunct faculty to be included as an integral component to their academic departments. The *Handbook of Research on Inclusive Development for Remote Adjunct Faculty in Higher Education* is a comprehensive reference work that presents research, theoretical frameworks, instructor perspectives, and program models that highlight effective strategies, innovative approaches, and unique considerations for creating professional development opportunities for remote adjunct faculty teaching online. This book provides concrete practices that foster inclusivity among contingent faculty teaching online, as well as tangible practices that have been successfully implemented from faculty developers and academic leaders at institutions who have a large population of and heavy reliance on remote adjunct instructors. While addressing topics that include faculty engagement, mentoring programs, and instructor resources, this book

intends to support remote instructors in the post pandemic world It is also beneficial for faculty development professionals academic administrative leaders higher education stakeholders and higher education faculty researchers and students
