1

Application of four modes

1. AP Mode

Application Environment: Wired Network, Network cable.

By the following process, connect on and connect the LAN port with network cable. When LED indicator shows green, mini router will work in AP mode. It will forward signal from cable to wireless signal. Then users can access the internet via wireless signal.

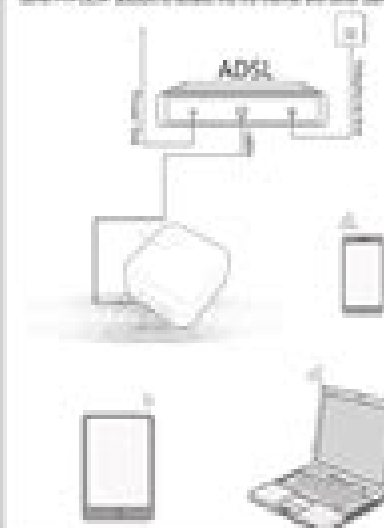

2

2. Repeater Mode

Application Environment: Wired Network, Network cable, or power supply.

By the following process, power on and connect the light port with network cable. When LED indicator shows red, mini router will work in Repeater mode.

If not only forward signal from cable to wireless signal, also there is some WIFI signal, it will forward into the internet via other ways.

3

3. Repeater Mode

Application Environment: Used to expand wireless signal coverage of AP and wireless router in double buildings and a single view.

By the following process, power on and connect the LAN port with network cable. When LED indicator shows blue, mini router will work in Repeater mode.

Forward mini router with cable by cable or wireless. Mini router expands wireless signal of upper router. Mini users get wireless signal of upper router to access the internet. Mini users need to use IP address and DNS address as per requirement of upper router.

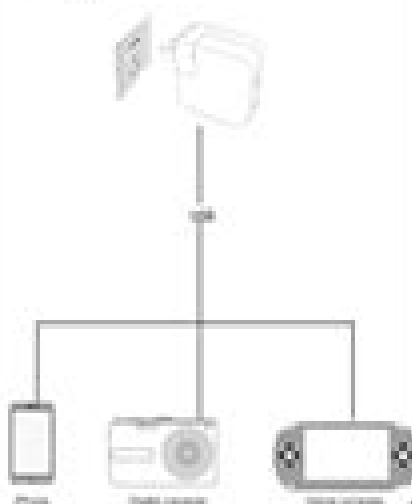

4

4. USB Storage

Application Environment: Any device need to be charged anytime.

As the following process, plug device into power outlet. When light is on, any device can be charged via USB interface.

Remark: This function only for the device with USB standard power (5V/1A).
