Electronics Mechanic (Theory) - II Mr. Rohit Manglik, 2024-05-18 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels

Energy-saving Principles and Technologies for Induction Motors Wenzhong Ma, Lianping Bai, 2017-11-29 A unique guide to the integration of three phase induction motors with the emphasis on conserving energy The energy saving principle and technology for induction motor is a new topic and there are few books currently available this book provides a guide to the technology and aims to bring about significant advancement in research and play an important role in improving the level of motor energy saving Includes new and innovative topics such as a case study of energy saving in beam pumping system and reactive compensation as a means of energy saving The authors have worked in this area for 20 years and this book is the result of their accumulated research and expertise It is unique in its integration of three phase induction motors with the emphasis on conserving energy Integrates the saving energy principle technology and method of induction motors with on site experiences showing readers how to meet the practical needs and to apply the theory into practice It also provides case studies and analysis which can help solve problems on site

Advances in Control Power Systems and Emerging Technologies Mohamed Bendaoud, Amine El Fathi, Farhad Ilahi Bakhsh, Siano Pierluigi, 2024-05-31 This edited book is an outcome of the selected papers presented at the International Conference on Electrical Systems Automation ICESA 2023 held from 29 to 30 May 2023 at the Faculty of Sciences and Technologies Al Hoceima Morocco This edited book is divided into two volumes This volume is divided into four parts each devoted to distinct yet interconnected aspects of the subject matter The first part presents the control of electrical machines and power converters It covers a comparative study of different control approaches including Proportional Integral PI Fuzzy Logic and Neural Fuzzy Logic Controllers for Boost Converters It also presents an innovative approach for single phase half bridge inverters and improved direct torque control of dual three phase permanent magnet synchronous motors Part 2 of the book titled Control Systems Automation thoroughly explores advanced control and automation technologies in electrical systems These chapters collectively showcase the latest developments and research across various engineering domains Several control approaches have been discussed such as fuzzy control sliding mode control artificial neural networks ANN and machine learning The third part highlights emerging technologies and applications in various fields such as mobile robots industry 4.0 agriculture and health The chapters cover a wide range of topics including intelligent navigation for autonomous robots self driving car perception and pedestrian detection machine learning for cloud and IoT based smart agriculture outdoor navigation systems for micro tractors healthcare intelligent systems for melanoma image classification maximizing the performance of Light Emitting Diode Luminaires The research explores innovative solutions and technologies

in different domains aiming to improve functionality in various applications Part 4 of this book is dedicated to Advanced Wireless Communication and Antenna Technology This part explores cutting edge developments and innovations in the realm of wireless communication and antenna design with a focus on their applications and impact in various fields **Advances**

in Control, Signal Processing and Energy Systems Tapan Kumar Basu,Swapan Kumar Goswami,Nandita Sanyal,2019-09-14 This book comprises select proceedings of the National Conference on Control Signal Processing Energy and Power Systems CSPES 2018 The book covers topics on both theoretical control systems and their applications across engineering domains such as automatic control robotics and adaptive controller design It discusses several signal processing domains such as image speech biomedical signal processing and their applications in IOT control robotics power and energy systems The book emphasizes both conventional and non conventional energy environment and green processes as related to energy and power systems engineering The contents of this book will prove to be useful for students researchers academics and professionals Manufacturing Technology, Electronics, Computer and Information Technology Applications Zhang

Yusoff,2012 One of the PWM schemes proposed for the control of inverters supplying ac drive is Delta Modulation Presently microcomputer has been used as an alternative to the standard Delta Modulation PWM technique Even though the microcomputer is considered as power computing machine their weakness is that to communicate with peripheral equipments they must use specialized circuit added as an external chips By utilizing the features of microcontroller they can just fit inside other device like the inverter or other appliance and also they does not need any other specialize external component for its application The microcontroller based delta modulated PWM for 3 phase inverter has been proposed in this project in order to get better solution for the control of inverter The simulation of Delta Modulation techniques is carried out using PROTEUS ISIS 7 0 in order to get six modes of delta modulated PWM switching scheme Then the microcontroller PIC18F4550 circuitry to generate Delta PWM is assembled The circuit from the simulation can produce the necessary Delta PWM signal to control the inverter **Proceedings of the ...
