Micrographia R. Hooke, 2020-07-29 Reproduction of the original Micrographia by R Hooke Global Milton and Visual Art Angelica Duran, Mario Murgia, 2021-03-18 Global Milton and Visual Art showcases the aesthetic appropriation and reinterpretation of the works and legend of the early modern English poet and politician John Milton in diverse eras regions and media book illustrations cinema digital reworkings monuments painting sculpture shieldry and stained glass It innovates an inclusive approach to Milton's literary art especially his masterpiece Paradise Lost in global contemporary aesthetics via intertextual and interdisciplinary relations The fifteen purposefully brief chapters 103 illustrations and 64 supplemental web images reflect the great richness of the topics and the diverse experiences and expertise of the contributors Part I Panoramas provides overviews and key contexts Part II Cameos offers different perspectives of the varied afterlives of the most widely circulating illustrations of Paradise Lost those by Gustave Doré Part III Textual Close ups focuses on a rich variety of book illustrations from centuries old elite engravings to a twenty first century graphic novel and Part IV A Prospect beyond Books explores visual media outside of books that manifest powerful connections direct and indirect with Milton's works and legend Micrographia Robert Hooke, 2019-12-24 Micrographia is a historic book by Robert Hooke detailing the then thirty year old Hooke's observations through various lenses Published in September 1665 the first major publication of the Royal Society it was the first scientific best seller inspiring a wide public interest in the new science of microscopy It is also notable for coining the biological term cell Observations Hooke most famously describes a fly's eye and a plant cell where he coined that term because plant cells which are walled reminded him of a monk's quarters Known for its spectacular copperplate engravings of the miniature world particularly its fold out plates of insects the text itself reinforces the tremendous power of the new microscope The plates of insects fold out to be larger than the large folio itself the engraving of the louse in particular folding out to four times the size of the book Although the book is best known for demonstrating the power of the microscope Micrographia also describes distant planetary bodies the wave theory of light the organic origin of fossils and various other philosophical and scientific interests of its author Publication Published under the aegis of The Royal Society the popularity of the book helped further the society's image and mission of being the scientifically progressive organization of London Micrographia also focused attention on the miniature world capturing the public's imagination in a radically new way This impact is illustrated by Samuel Pepys's reaction upon completing the tome the most ingenious book that I ever read in my life Hooke also selected several objects of human origin among these objects were the jagged edge of a honed razor and the point of a needle seeming blunt under the microscope His goal may well have been as a way to contrast the flawed products of mankind with the perfection of nature and hence in the spirit of the times of biblical creation Francis Watkins and the Dollond Telescope Patent Controversy Brian Gee, edited by Anita McConnell, 2016-04-15 Francis Watkins was an eminent figure in his field of mathematical and optical instrument making in mid eighteenth century London Working from

original documents Brian Gee has uncovered the life and times of an optical instrument maker who at first glance was not among the most prominent in his field In fact because Francis Watkins came from a landed background the diversification of his assets enabled him to weather particular business storms discussed in this book where colleagues without such an economic cushion were pushed into bankruptcy or forced to emigrate He played an important role in one of the most significant legal cases to touch this profession namely the patenting of the achromatic lens in telescopes The book explains Watkins s origins and how and why he was drawn into partnership with the famous Dollond firm who at that point were Huguenot incomers The patent for the achromatic telescope has never been satisfactorily explained in the literature and the author has gone back to the original legal documents never before consulted He teases out the problems lays out the evidence and comes to some interesting new conclusions showing the Dollonds as hard headed and ruthless businessmen ultimately extremely successful The latter part of the book accounts for the successors of Francis Watkins and their decline after over a century of successful business in central London

Locus Solus Selen Ansen, Süreyya Evren, 2022-06-01 Arter initiated a new publication series ARTER BACKGROUND in 2019 to accompany exhibitions drawn from its collection which holds more than 1 400 works of art The fourth book of the series accompanies Locus Solus which brings together selected works from the Arter Collection with several large scale installations including site specific new productions with an aim to explore the idea of nature through the lens of facts fictions and emotions In the book excerpts of textual and visual contents selected around the ideas active in the curatorial process of the exhibition are complemented by new works produced specifically for this context While the exhibition curated by Selen Ansen deals with the ways in which nature and culture permeate and affect each other the accompanying publication through its distinctive editorial structure features texts pointing towards extinct territories subconscious landscapes foreign lands fictive rooms heres elsewheres and nowheres wonderlands heavenly earthly and subterranean realms alongside commissioned essays by Sena Baş and Pascal Janovjak and Su Pola This book reflects the exhibition which it accompanies and whose spaces and reflections on the idea of nature it extends It amounts to a territory the contours of which are fluid semi autonomous inhabited by a variety of spaces and times One may peruse it while sitting standing or lying down in broad daylight or when the night has fallen in clear or foul weather in or outdoors just as one would with any other book that fell into one s hands One will probably make one s way into it unaccompanied since it is customary to read alone and in silence Once inside it will be preferable to keep one s eyes open in order to understand where one sets foot yet not to neglect to close them so as to be able to wander off beyond its borders This neither too long neither too short book is also a body a hybrid body composed of heterogeneous worlds and points of view assembled according to the good neighbour principle so cherished by Aby Warburg It compiles fragments of texts uprooted from their original context some of which are published as a whole others devised within the framework of the exhibition It also contains images some speechless others quite talkative which again have been deterritorialised moved out

of their original context in order to become reterritorialised in new surroundings One will find less theory here than fiction fewer essays than narrations versified poetry and free prose a manifesto dictionary and encyclopaedia pages more solitude than crowds more vegetation than concrete at least as many unspoken as vocalised thoughts Selen Ansen with contributions by Sena Ba z John Berger Jen Bervin Karl Blossfeldt Richard Brautigan Charles Burns Joseph Conrad Julio Cort zar Karel apek Evliy elebi Ferit Edg Helmut Eisendle Gianni Guadalupi Marlen Haushofer Robert Hooke Pascal Janovjak Kamo no Ch mei Gizem Karaka Tetsumi Kudo D H Lawrence Leo Lionni Lucretius Maurice Maeterlinck Xavier de Maistre Alberto Manguel Winsor McCay Claudio Morandini Murathan Mungan Bar Pirhasan Pliny the Elder Su Pola Robert Pufleb Jochen Rai Iv n Repila Raymond Roussel Nadine Schlieper Carl Seelig Gertrude Stein Michel Tournier Robert Walser Aby Warburg Lynd Ward Volkan Yalazay **How to Write, Publish, and Present in the Health Sciences** Thomas Allen Lang,2010 From the acclaimed author of the standard reference on reporting statistics in medicine this new resource explains how to create effective scientific articles research proposals abstracts posters and slide presentations It describes how to write efficiently and how to prepare tables charts graphs illustrations and images for publication A wealth of key concepts practical information common mistakes and helpful tips make this book invaluable **English Literature & Printing from the XVth to XVIIIth Century** Maggs Bros,1922 ...English Literature & Printing from the XVth to XVIIIth Century...
