Like no other text, it combined an experimental emphasis with extensive pedagogical features to help students grasp basic concepts. Now in a thoroughly updated new edition, Kuby Immunology remains the only undergraduate introduction to immunology written by teachers of the course. In the Kuby tradition, authors Jenni Punt, Sharon Stranford, Patricia Jones, and Judy Owen present the most current topics in an experimental context, conveying the excitement of scientific discovery and highlighting important advances, but do so with the focus on the big picture of the study of immune response, enhanced by unsurpassed pedagogical support for the first-time learner. Punt, Stranford, Jones, and Owen bring an enormous range of teaching and research experiences to the text, as well as a dedication to continue the experiment-based, pedagogical-driven approach of Janis Kuby. For this edition, they have worked chapter by chapter to streamline the coverage to address topics that students have the most trouble grasping and to continually remind students where the topic at hand fits in the study of immunology as a whole.

Pathophysiological Phenomena in Nursing Virginia Carrieri-Kohlman, Ada M. Lindsey, Claudia M. West, 2003. Knowledge and understanding about human responses to a range of significant biological processes, symptoms, and clinical manifestations of illness. This book provides a basis for developing or examining the current knowledge and evidence base for nursing practice in these important areas across the age and health/illness continuums. Five biological life processes form the book's broad organizational structure: Regulation, Cognition, Sensation, Protection, and Motion.
