**Frame-Semantic Perspective** Niels Brause, 2017-03-07 Bachelor Thesis from the year 2016 in the subject English Language and Literature Studies Linguistics grade 1.3 University of Duisburg Essen Department of Anglophone Studies language English abstract One cannot escape them because they are everywhere There is scarcely a day without one coming across them They are a humorous picture a witty message or a funny video you find on the internet They are in our newsfeed on our message boards or in personal messages from our friends These sources of entertainment seem to be by now an important element of today's web society and there is a huge number of image boards like 9gag.com or reddit.com which have no other purpose than satisfying our needs for these sources of entertainment Even a growing number of newspapers have started to include this type of content in their online platforms A term that is often used to describe this accumulation of different visual entities is the term memes but this term is vague and ambiguous and it does not specifically say what kind of phenomena are included in it This bachelor thesis is an attempt to establish these phenomena labelled as memes as valuable objects for

linguistic studies It will glance at several linguistic theories and check their relevance for analysing image macros as representatives for memes in general Finally it will analyse image macros by using the frame semantic framework thus integrating the former accomplished insights in one theoretic framework with only a few central terms This will support the thesis that frame semantics is capable of describing the patterns of encyclopaedic knowledge needed in order to understand complex bimodal entities

**LOLspeak Verb Semantics. Aspect and Situation Type Emphasis in a Weird English Dialect** Marc Backhaus, 2015-02-04 Seminar paper from the year 2014 in the subject English Language and Literature Studies Linguistics grade 1 3 Humboldt University of Berlin Institut f r Anglistik Amerikanistik course SE Verb Semantics language English abstract LOLspeak has established itself as a remarkably distinct form of online English language The dialect used in memes with LOLcats has developed from being a Netspeak offspring slang used to make amusing text for funny cat pictures to a language phenomenon with regularities and patterns that make it a complex and systematic reimagining of the English language It has transgressed its meme boundaries and manifested in commentary forums the bible rewrite LOLcat Bible Translation Project and has become the subject of a number of academic works From a verb semantic point of view LOLspeak jumps directly into the eye with its simplification and regularisation of verbs The dialect in fact seems to be putting strong emphasis on the verb and its function amidst a sentence by shifting not only several grammatical components but in this way also the aspect situation type the verb and its correlating items in a sentence operate in In doing so it seems to be stressing the importance of the verb in this context as well as making aware of what in fact and in detail composes the aspect and situation type of a sentence Is LOLspeak therefore a dialect of English that is worth appraising linguistically for its instructive educational value or is it a simple language play that rather bears the contrary effect and degenerates the English language with its shifting and breaking of linguistic rules
