This volume also includes a research bibliography on international organizations and transnational associations **Law and Corporate Behaviour** Christopher Hodges, 2015-10-22 This book examines the theories and practice of how to control corporate behaviour through legal techniques. The principal theories examined are deterrence economic rational acting responsive regulation and the findings of behavioural psychology. Leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the USA public enforcement of competition law by the European Commission and the recent reform of policies on public enforcement of regulatory law in the United Kingdom. Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied. Sectors examined include financial services civil aviation pharmaceuticals and workplace health safety. Key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance. Systems in which reporting is essential for safety only function with a no blame culture. The book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles. Hence the book proposes a new theory of ethical regulation. This title is included in Bloomsbury Professional's International Arbitration online service.

Handbook on Hybrid Organisations David Billis, Colin Rochester, 2020-02-28 Hybrid Organisations that integrate competing organisational principles have become a preferred means of tackling the complexity of today's societal problems. One familiar set of examples are organisations that combine significant features from market public and third sector organisations. Many different groundbreaking approaches to hybridity are contained in this Handbook which brings together a collection of empirical studies from an international body of scholars. The chapters analyse and theorise the position of hybrid organisations and have important implications for theory practice and policy in a context of proliferating hybrid forms of organisation.

The Emergence of Brand-Name Capitalism in Late Colonial India Douglas E. Haynes, 2022-09-22 This book examines the emergence of professional advertising in western India during the interwar period. It explores the ways in which global manufacturers advanced a brand name capitalism among the Indian middle class by promoting the sale of global commodities during the 1920s and 1930s, a time when advertising was first introduced in India as a profession and underwent critical transformations. Analysing the cultural strategies both verbal and visual used by foreign businesses in their advertisements to capture urban consumers, Haynes argues that the promoters of various commodities crystalized their campaigns around principles of modern conjugality. He also highlights the limitations of brand name capitalism during this period, examining both its inability to cultivate markets in the countryside or among the urban poor and its failure to secure middle class customers. With numerous examples of illustrated advertisements taken from Indian newspapers, the book discusses campaigns for male sex tonics and women's medicines, hot drinks such as Ovaltine and Horlicks, soaps such as Lifebuoy, Lux and Sunlight, cooking mediums such as Dalda and electrical household technologies. By examining the formation of brand name capitalism and two key structures that accompanied it, the advertising agency and the field of professional advertising, this book sheds new light on the global consumer economy in interwar India and places developments in South Asia into a larger global history of consumer capitalism.
