Arctic Shipping Frédéric Lasserre, Olivier Faury, 2019-09-05 This book considers both the present state of Arctic shipping and possible future trends with reference to the various sectors of maritime transportation cruise tourism container traffic and bulk shipping Ports are analysed as tools that support the strategies of coastal states to foster the development of resource extraction enhance the attractiveness of Arctic shipping lanes and enable the control of maritime activities through coast guard deployment The aim of this book is to draw a picture of the trends of Arctic shipping How is traffic evolving in Canada s Arctic or along the Northern Sea Route Are there significant differences between bulk and container shipping segments when considering the Arctic market How are the ports and the hinterland developing and what are the strategies behind those How is the legal framework shaping the evolution of maritime transportation The contributors to this book consider all of these questions and more as they map out the prospects for Arctic shipping and analyse in detail the development of Arctic shipping as a result of multi variable interactions This book will be key reading for industry professionals and post graduate students alike

The Economics of the Global Defence Industry Keith Hartley, Jean Belin, 2019-11-08 This book makes an original contribution to

our knowledge of the world's major defence industries. Experts from a wide range of different countries from the major economies of North America and Western Europe to developing economies and some unique cases such as China, India, Singapore, South Africa and North Korea describe and analyse the structure, conduct and performance of the defence industry in that country. Each chapter opens with statistics on a key nation's defence spending, its spending on defence R D and on procurement over the period 1980 to 2017, allowing for an analysis of industry changes following the end of the Cold War. After the facts of each industry, the authors describe and analyse the structure, conduct and performance of the industry. The analysis of structure includes discussions of entry conditions, domestic monopoly, oligopoly structures and opportunities for competition. The section on conduct analyses price, non-price competition, including private and state-funded R D and performance, incorporates profitability, imports and exports, together with spin-offs and technical progress. The conclusion explores the future prospects for each nation's defence industry. Do defence industries have a future? What might the future defence firm and industry look like in 50 years' time? This volume is a vital resource and reference for anyone interested in defence economics, industrial economics, international relations, strategic studies and public procurement.

*Ukraine Over the Edge* Gordon M. Hahn, 2018-02-08. The Ukrainian crisis that dominated headlines in fall 2013 was decades in the making. Two great schisms shaped events: one within Ukraine, its western and southeastern parts divided along cultural and political lines; the other was driven by geopolitical factors. Competition between Russia and the West exacerbated Ukraine's divisions. This study focuses on the historical background and complex causality of the crisis, from the rise of mass demonstrations on Kiev's Maidan Nezalezhnosti (Independence Square) to the making of the post-revolt regime. In the context of a new cold war, the author sheds light on the role of radical Ukrainian nationalists and neofascists in the February 2014 snipers' massacre, the ouster of President Viktor Yanukovich and Russia's seizure of Crimea and involvement in the civil war in the eastern region of Donbass.
