Dr. Montessori's Own Handbook Maria Montessori, 2011-03-30 This is the book that Maria Montessori wrote in response to requests from thousands of American parents and teachers A short illustrated guide to the use of the Montessori classroom materials it shows how to set up a children's house an environment for learning where children can be their own masters free to learn at their own pace Frames for lacing and buttoning geometrical wooden inserts sound cylinders sandpapers letters colored numerical rods these are familiar features of any Montessori classroom whether in the pioneering days or today Dr Montessori explains how to use these materials with preschool children to stimulate their powers of observation recognition judgment and classification These self-correcting learning tools are the original teaching machines for young children Inherently logical and aesthetically pleasing they were designed to hone the child's visual auditory and tactile perceptions Dr Montessori stresses that each child approaches the apparatus differently The role of the adult whether teacher or parent is to let the child experiment perceive his own mistakes and run his own risks in learning With black and white illustrations throughout

Montessori for Toddlers Maria Graham, 2020-04-21 Do you want to learn home Montessori activities to do with your child If yes then keep reading When you think about school you are probably thinking about the elementary school years you spent sitting at your desk and listening to your teacher most of the day While this school method is still the most popular to date another lesser-known school method is becoming increasingly popular among parents and educators The Montessori school method has become very popular in recent years However this type of school uses a method very different from the conservative one and its application is therefore still somewhat controversial Dr Maria Montessori was a professor of anthropology in Rome in the early twentieth century Maria Montessori was heavily influenced by Friedrich Froebel who invented the nursery school and Johann Heinrich Pestalozzi and firmly believed that children learned through activities He invented a new philosophy on raising children Maria Montessori's philosophy and methodology teach that children learn more in a stimulating environment According to her philosophy a teacher is more of a keeper of the environment and helps to create one that facilitates the self-guided learning process for children Today many teachers and parents strongly follow this type of education as evidenced by the growing number of Montessori schools in the world What are the differences between Montessori schools and traditional schools In traditional classrooms children of the same age are grouped together and follow exactly the same lessons participate in the same activities and work Montessori classrooms are very different Typically a Montessori classroom is designed for children of different ages and follows an open concept style with different work areas Lessons are generally held in small groups of children while other children work or study alone This concept allows children to expand their individual and social development In a traditional school the teacher acts as the one who provides all the information offered by the school and mainly uses books and a rigorous methodology In a

Montessori school the teacher acts as a guide and often mixes conventional teaching aids but also other materials such as stories and objects In Montessori schools students often take responsibility for planning their work and time Montessori students strong artists While many parents firmly believe in the Montessori method this school method is still quite unknown and often controversial However it has been shown by psychologists in the United States that the children of the Montessori schools not only received an excellent education but in some areas even exceeded the children who attended traditional schools Furthermore students attending Montessori schools seemed to outperform others when it came to social skills and behaviors This book covers the following topics Who was Montessori Creating the right environment Organizing the spaces at home Practical activities Sensorial activities Language activities Self discovering Conflict resolution temper tantrum Montessori parenting habit Socialization How to unleash the child s creative potential And much more So what are you waiting for Learn more about Montessori method now

For the Love of Teaching Ira D. Shull, 1998 Multicultural perspectives abound in these interview portraits of teachers from every state and setting Any stereotypes readers may have about teachers will go right out the window as they enjoy these anecdotes that reveal the real reasons teachers teach Seven themes emerge life work connection change surprise adventure fulfillment and love Represented in fifty four interviews with teachers are all fifty states plus Puerto Rico as a U S commonwealth all grades urban suburban and rural areas private and public schools and alternative settings such as military and prison classrooms The author s questions remain hidden as the teachers in their own separate voices reflect on their work The author notes By listening to the voices of those who would teach us we come to understand not only what learning means but what living means For it is through our teachers that we begin to discover who we are as human beings and what we want to be as a society The Foreword was written by Eric Oddleifson a successful businessman who is also active in efforts to improve American schools He writes This book describes the type of person we need to attract to the teaching profession as it gives voice to the enthusiasm the passion the commitment that invades his or her being There can be no finer calling requiring the clearest demonstration or moral and ethical behavior

Montessori Classroom Lesson Plans Robin Norgren M a, 2019-09-19 Montessori Lesson Plans Teachers Will Be Proud to Teach these In depth Lesson Plans that Integrate the 9 main areas in the Montessori classroom Why Did I Create These Lesson Plans I connected with the Montessori philosophy and I was excited to get started I was armed with my albums the term used to describe the curriculum covered with the students within a three year learning cycle I had the privilege of experiencing my first primary classroom Unfortunately the former Montessori Teacher also known as the Guide or Directress before left no records tracking the progress of the children I had in my charge I started to panic wondering where I would even begin Can you believe this has happened to me Twice These

DAILY lesson plans are the answer to this dilemma and situations similar to this one This is great for directors of schools who want to maintain quality control in the classroom setting and for parents piece of mind Topics We Introduce in October Human Needs Family Love Shelter Food Clothing Community The Universe Our Solar System FAQ Q Are your Montessori Lesson Plans an entire year s curriculum A I am working on creating Montessori education as an entire year s curriculum This educational service has been taught at three different schools I am basically gathering my notes and tweaking what I found worked best and compiling the information into lesson plans The full year makes one complete cycle through what is traditionally called the Primary Albums I have completed my AMS Training and am in the process of finishing my AMI Certification These lesson plans can be taught to ages 3 6 years old The curriculum is more like a spiral in that each year it is used the child continues to learn at his or her own level and pace In the classroom or small group situation the older child will be a model for the younger children and become the expert as they themselves continue to learn on new levels branching out into related areas of interest Q Do I need Montessori Training to Teach these lesson plans A It is ideal to have gone through a Montessori training The lesson plans DO NOT offer the detailed step by step lessons found in the Montessori Albums These lesson plans assist the Montessori teacher to ensure that he she is following a reasonable scope and sequence throughout the year honoring each area of the Montessori classroom in the process Q How do I get started Can I begin the curriculum in the middle of the year A It is ideal to begin with the September guide The Montessori materials are introduced sequentially beginning in the September guide Q How do you create a 3 hour work time A The ideal is a 2 1 2 to 3 hour work period but this will vary according to age interests attention span etc Early in the year a 3 hour work period is usually not practical as the children have not yet normalized and may become restless after two hours or less As the year progresses they will have received more lessons and developed self discipline and the ability to work on their own and for a longer length of time In fact they are often reluctant to put work away when it is time to stop so give a gentle warning about five minutes before the work period is over This can be done by softly singing Time to put your work away time to your work away time to put your work away and come to the line or whatever is next Just use a simple melody if you aren t familiar with this song Q How can I use the guides without feeling that I need to do almost everything A There is enough material in the guides for about three years so don t try to do everything the first year The curriculum will grow with the child each year it is used Many schools use a two or three year period to complete the curriculum cycle

Overcoming Inequalities in Schools and Learning Communities: Innovative Education for a New Century Rocio Garcia-Carrion, Roseli Rodrigues De Mello, Arnetha F. Ball, 2020-03-24 Educational inequalities have strongly impacted disadvantaged and underserved populations such as indigenous Roma migrant children students with disabilities and those affected by poverty A wide array of research has contributed to explaining the mechanisms and effects of inequalities in the achievement patterns dropout rates

disengagement in the school experiences of children and youth traditionally excluded. Research also suggests the negative consequences for child development including cognitive language and social emotional functioning of poverty and lack of quality education in the early years. Consequently the current unequal access to optimal learning environments for every single child to succeed in education and to have a better life perpetuates the exclusion and neglects their right to education for those minorities. This Research Topic aims at moving beyond causes and shed light upon effective solutions by providing successful pathways for integration and inclusion of the learners most heavily affected. Scholars worldwide are looking for successful actions with children youth and communities of learners historically underserved to overcome educational and social exclusion. These transformative approaches go beyond the deficit thinking and are grounded in theories empirical evidence and multidisciplinary interventions oriented towards achieving social impact which refers to the extent to which those actions have contributed to improve a societal challenge. The international network of Schools as Learning Communities is advancing knowledge on deepening and expanding the impact of what has been defined as Successful Educational Actions SEAs that is those interventions that improve students achievement and social cohesion and inclusion in many diverse contexts regardless the socioeconomic national and cultural environment of schools. Drawing on the evidence generated by this network of researchers to address the global challenge of inequality by studying educational actions oriented towards achieving social impact and potentially transferrable to other contexts this Research Topic aims at deepening on this approach. In short our purpose is that the contributions included in this Research Topic contribute to reduce educational and social inequalities and especially benefit those populations most in need.
