Wards newly designed refrigerators are manufactured in the most complete and up-to-date plant in the country, and must meet the most rigid specifications in the industry.

Every refrigerator is actually operated and checked for efficiency. After an eight-hour operating test, it is moved into a "quiet" room where units are checked for quiet operation. Following the quiet test the refrigerator is thoroughly cleaned and inspected.

### UNPACKING AND ASSEMBLY

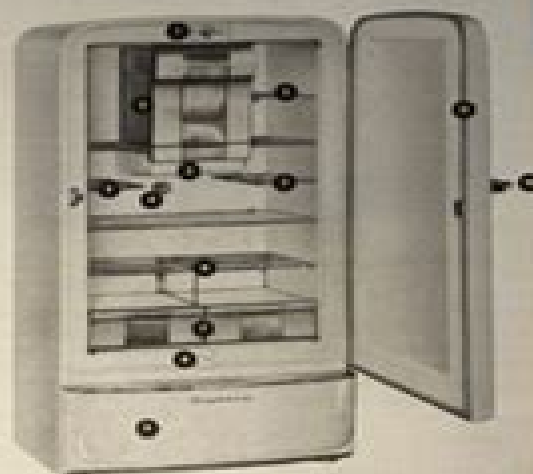

All parts which might rattle or move around in transit are securely packed in the food compartment. The refrigerator is then placed in a specially de-

signed crate and shipped to you in the store in which you made your purchase. Shelves are in their regular position, securely held in place by small metal fasteners or clips. The clips may be removed by straightening the tabs with the flat end of a screwdriver under the end of the tabs and prying tabs away from the shelf wire or frame.

The Food Freshener and Food Trays are secured in place with cardboard and tape. Remove the tape and packing materials so these items glide freely in the channels which support them. Glass shelves, etc., that cover Food Freshener are packaged separately and secured. Open these packages, clean and place in proper location. The ice trays and grids will be found in a separate package. Remove contents, clean and place in freezer.

See Figures 1, 2, or 3 for your type of refrigerator illustrating the manner in which the accessories are placed in the cabinet.

Inspect your refrigerator thoroughly at the time of delivery to make certain no damage has been incurred during shipment. This eliminates any doubt about the possibility of damage having been done in the home. In event of damage, mail Order customers should file claim at once with claim agent of the railroad or trucking company that delivered the refrigerator. Retail Store customers should inform the store or its representative immediately.
