

MOONRAKER 26

The Moonraker is a small yacht or large trailer yacht and was designed to fit into the growing market of maximum size trailer craft.

It seems that the emphasis is now towards larger trailerable yachts, partially due to the lack of mooring space, especially in places like Auckland and Wellington.

The Moonraker was first released at the 1976 Auckland Boat Show and attracted a tremendous amount of interest. It's one of the new breed of 'fixed keel' trailer yachts, with only 70cm total draught. The keel is long, low and flat, and although not designed for 'the racing yachting' is ideal for the cruising family man. However a fixed keel version is available and the Moonraker would make a fast little racing machine.

Moonraker is a big trailer yacht with a lot of thought given to the interior layout and appointments.

Accommodation is provided for five with two quarter berths, two single berths in the main saloon and a single athwartships berth in the forward cabin. All berths are covered with thick foam and covered in either vinyl or waterproof material.

The main cabin features a separate compartment for the marine toilet complete with wash basin. On the other side, the complete galley comes standard with two burner gimbaled gas stove, stainless steel sink, plus ample storage space for food and ancillary equipment. A cup rack and plate holder add a little extra stowage area to the galley.

Visibility from the main cabin is excellent with a big long side window along each side. There is full standing headroom in the Moonraker—an excellent feature for a trailer yacht.

Access to the interior is gained via the cockpit with a companionway which can be moved either port or starboard to give good access to quarter berths or the gear-well. The well is ideal for stowage of food, etc., for anyone planning a lengthy holiday cruise. If you prefer to have a small in-board auxiliary, a 5hp or 8hp Yanmar diesel is available and fits neatly under the cockpit in the gear-well. A small outboard up to 15hp is the common auxiliary power plant and stows away in the completely watertight after peak. This easily accessible area is also ideal for storage of gas bottles and fuel. It is interesting to note that the
