Genetically Engineered Crops National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Genetically Engineered Crops: Past Experience and Future Prospects, 2017-01-28 Genetically engineered GE crops were first introduced commercially in the 1990s After two decades of production some groups and individuals remain critical of the technology based on their concerns about possible adverse effects on human health the environment and ethical considerations At the same time others are concerned that the technology is not reaching its potential to improve human health and the environment because of stringent regulations and reduced public funding to develop products offering more benefits to society While the debate about these and other questions related to the genetic engineering techniques of the first 20 years goes on emerging genetic engineering technologies are adding new complexities to the conversation Genetically Engineered Crops builds on previous related Academies reports published between 1987 and 2010 by undertaking a retrospective examination of the purported positive and adverse effects of GE crops and to anticipate what emerging genetic engineering technologies hold for the future This report indicates where there are uncertainties about the economic agronomic health safety or other impacts of GE crops and food and makes recommendations to fill gaps in safety assessments increase regulatory clarity and improve innovations in and access to GE technology Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set) Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events *Socioeconomic Evaluation of Megaprojects* Markku Lehtonen, Pierre-Benoît Joly, Luis Aparicio, 2016-11-22 The governance and evaluation of megaprojects that is large scale complex high stakes infrastructure projects usually commissioned by governments and delivered through partnerships between public and private organisations is receiving increased attention However megaproject evaluation has hitherto largely adopted a linear rationalist perspective to explain the frequent failure of such projects to meet the iron triangle of performance criteria delivering on time within budget and according to specifications This approach recommends greater control and accountability to remedy megaproject pathologies Drawing on empirical examples mainly from the transport sector and radioactive waste disposal this book offers new perspectives to megaproject evaluation Comprising contributions from leading experts in project evaluation and appraisal this collection opens up new avenues by suggesting two ways of improving megaproject evaluation 1 approaches that go beyond the dominant linear rationalist notion of policy processes and emphasise instead the objective of opening up appraisal processes in order to enhance learning and reflexivity and 2 approaches that extend evaluative criteria beyond the iron triangle to cover the various socioeconomic impacts and preconditions for project success This volume will be of great relevance to scholars and practitioners with an interest in megaprojects energy and climate policy radioactive waste management urban design and project planning and management *Review of WIC Food Packages* National Academies of

Sciences, Engineering, and Medicine, Institute of Medicine, Food and Nutrition Board, Committee to Review WIC Food Packages, 2016-07-06 The Special Supplemental Nutrition Program for Women Infants and Children WIC began 40 years ago as a pilot program and has since grown to serve over 8 million pregnant women and mothers of and their infants and young children Today the program serves more than a quarter of the pregnant women and half of the infants in the United States at an annual cost of about 6.2 billion Through its contribution to the nutritional needs of pregnant breastfeeding and post partum women infants and children under 5 years of age this federally supported nutrition assistance program is integral to meeting national nutrition policy goals for a significant portion of the U S population To assure the continued success of the WIC Congress mandated that the Food and Nutrition Service of the U S Department of Agriculture USDA reevaluate the program s food packages every 10 years In 2014 the USDA asked the Institute of Medicine to undertake this reevaluation to ensure continued alignment with the goals of the Dietary Guidelines for Americans This the second report of this series provides a summary of the work of phase I of the study and serves as the analytical underpinning for phase II in which the committee will report its final conclusions and recommendations

California Agriculture, 2017 **Civic Engagement in Food System Governance** Alan R. Hunt, 2015-10-05 The local food movement is one of the most active of current civil engagement social movements This work presents primary evidence from over 900 documents interviews and participant observations and provides the first descriptive history of local food movement national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements It provides a US UK comparative context significantly updating earlier comparisons of American British and European farm and rural policies The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences
