The People's Spaceship Amy Paige Kaminski, 2025-07-15 When the Apollo 11 astronauts returned from humanity's first voyage to the moon in 1969 NASA officials advocated for more ambitious missions. But with the civil rights movement, environmental concerns, the Vietnam War, and other social crises taking up much of the public's attention, they lacked the support to make those ambitions a reality. Instead, the space agency had to think more modestly and pragmatically, crafting a program that could leverage the excitement of Apollo while promising relevance for average Americans. The resulting initiative, the space shuttle, would become the centerpiece of NASA human space flight activity for forty years, opening opportunities for the public to engage with and participate in space projects in new ways. *The People's Spaceship* traces how and why NASA painstakingly connected the vehicle to so many segments of society. Underscoring the successes and challenges endured in the process, Amy Paige Kaminski shares the story of how the space shuttle became an American technological icon.

*Memories Set in Stone—How Visitors Make Sense of Memorials* Larissa Hugentobler, 2025-09-30 In this open access book, Larissa Hugentobler explores the world of public memorials, highly visible and at times contentious media which communicate a nation's values and ideals, its public memory. By celebrating a selection of a nation's history, the memorial landscape has long rendered marginalized groups virtually invisible. This book focuses on two rare celebratory U.S. memorials in Washington DC dedicated to a member of a marginalized community: Dr. Martin Luther King Jr. The author explores how visitors experience the two cultural sites, including their narratives about King and the Civil Rights Movement. For a holistic understanding, Hugentobler combines analyses of visitor experiences on site and on Instagram with expert interviews and autoethnographies. This allows for insights into the importance of celebratory memorials to individuals from marginalized communities and why those memorials matter to visitors. By acknowledging that the memorial experience is not limited to the time and space of a visit, this book begins to answer the urgent question of the roles of the offline and online realms in commemoration and highlights how each can contribute to a memorial landscape that is meaningful to a variety of people.

Supermarket USA Shane Hamilton, 2018-09-18 This cultural history examines the global rise of American-style supermarkets during the Cold War era and how they shaped the way we eat today. Supermarkets were invented in the United States and from the 1940s on, they made their way around the world, often explicitly to carry American-style economic culture with them. This innovative history tells us how supermarkets were used as anticommunist weapons during the Cold War and how their proliferation has shaped our current food system.

The widespread appeal of supermarkets contributed to a arms race between the United States and the Soviet Union as the superpowers vied to show that their contrasting approaches to food production and distribution were best suited to an abundant future. In the aftermath of the Cold War US food power was transformed into a global system of market power laying the groundwork for the emergence of our contemporary world in which transnational supermarkets operate as powerful institutions in a global food economy
