Nord, 2020-10-30 This book investigates the multifaceted nature of change in today s Nordic Arctic and the necessary research and policy development required to address the challenges and opportunities currently faced by this region It focuses its attention on the recent efforts of the Nordic community to create specialized Centers of Excellence in Arctic Research in order to facilitate this process of scientific inquiry and policy articulation The volume seeks to describe both the steps that lead to this decision and the manner in which this undertaking as evolved The work highlights the research efforts of the four Centers and their investigations of a variety of issues including those related to ecosystem and wildlife management the revitalization resource dependent communities the emergence of new climate born diseases and the development of adequate modeling techniques to assist northern communities in their efforts at adaptation and resilience building Major discoveries and insights arising from these and other efforts are detailed and possible policy implications considered The book also focuses attention on the challenges of creating and supporting multidisciplinary teams of researchers to investigate such concerns and the methods and means for facilitating their collaboration and the integration of their findings to form new and useful perspectives on the nature of change in the contemporary Arctic It also provides helpful consideration and examples of how local and indigenous communities can be engaged in the co production of knowledge regarding the region The volume discusses how such

research findings can be best communicated and shared between scientists policymakers and northern residents It considers the challenges of building common concern not just among different research disciplines but also between bureaucracies and the public Only when this bridge building effort is undertaken can true pathways to action be established

Jurisdiction to Tax Corporate Income Pursuant to the Presumptive Benefit Principle Eva Escribano, 2019-05-10 Jurisdiction to Tax Corporate Income Pursuant to the Presumptive Benefit Principle intends to demonstrate that the profit shifting phenomenon i e the ability of companies to book their profits in jurisdictions other than those that host their economic activities is real severe undesirable and above all the natural consequence of both the preservation of three fundamental paradigms that have historically underlain corporate income taxes and their precise legal configuration In view of this the book submits a number of proposals in relation to the aforementioned paradigms and in the light of the suggested presumptive benefit principle so as to counteract profit shifting risks and thus attain a more equitable allocation of taxing rights among States This PhD thesis obtained the prestigious European Academic Tax Thesis Award 2018 granted by the European Commission and the European Association of Tax Law Professors What s in this book This book provides a disruptive discourse on tax sovereignty in the field of corporate income taxation that endeavors to escape from long standing tax policy tendencies and prejudices while considering the challenges posed by a globalized and increasingly digitalized economy In particular the book offers an innovative perspective on certain deep rooted paradigms historically underlying corporate income taxation tax treatment of related parties within a corporate group along with the arm s length standard corporate tax residence standards and definition of source for corporate income tax purposes with a particular emphasis on the permanent establishment concept The book explores their respective origins supposed tax policy rationales structural problems and interactions ultimately showing how the way tax jurisdiction is currently defined through them inherently tends to trigger profit shifting outcomes In view of the conclusions of the study the author suggests the use of a new version of the traditional benefit principle the presumptive benefit principle that would contribute to address the profit shifting phenomenon while serving as a practical guideline to achieve a more equitable allocation of taxing rights among jurisdictions Finally the book submits a number of proposals inspired by the aforementioned guideline that aspire to strike a balance between equity effectiveness and technical feasibility They include a new corporate tax residence test and most notably a proposal on a new remote sales permanent establishment How this will help you With its case study based on the Apple group empirically demonstrating the existence of the profit shifting phenomenon its clearly documented exposure of the reasons why traditional corporate income tax regimes systematically give rise to these outcomes its new tax policy guideline and its proposals for reform this book makes a significant contribution to current tax policy discussions concerning corporate income taxation in cross border scenarios It will be warmly welcomed by all concerned policymakers scholars practitioners with the greatest tax policy challenges that corporate income taxation is facing in the contemporary world

Banks as Security Actors Esmé Bosma, 2025-04-22 This

book analyses how banks implement counter terrorist financing measures and experiment with technologies to assess risks and make security decisions Banks have become private security actors As gatekeepers of the financial system they are legally obliged to conduct customer research and monitor bank accounts for unusual or suspicious transactions Given the sheer volume of financial transactions that banks process daily detection of financial crime heavily relies on digital security technologies that help analysts categorise and identify risky customers and financial transactions Drawing from theories at the intersection of International Relations and Science and Technology Studies the book advances the concept of de scription to offer a framework for analysing experimentation with security and digital technologies in practice The research is based on fieldwork conducted in the financial crime sector in the Netherlands and the United Kingdom It explores how political and ethical choices materialise at the human technology interface and analyses the production of customer risk profiles the design and use of transaction monitoring systems and the emergence of public private partnerships to counter terrorist financing This book will be of interest to students and researchers in International Relations Science and Technology Studies and Critical Security Studies

Fragmentation and the European Patent System Karen Walsh, 2022-08-11 This book provides an in depth study on current perceptions of and responses to fragmentation in the European patent system EPS For decades attempts have been made to address this fragmentation by introducing a unitary patent system The most recent attempt the EU unitary patent system will be the first of its kind It is expected to significantly change the EPS However rather than reducing existing fragmentation it will likely add to it Based on an analysis of the current and forthcoming system the book argues that the inherent nature of fragmentation within the EPS needs to be recognised and suggests that a multifaceted approach is required to respond to it Uniquely it draws on work regarding fragmentation outside of the patent and intellectual property regimes gaining insights from both European law making and the international legal system These insights are used to investigate current responses to fragmentation in the EPS Interpretations of substantive patent law are examined including claim construction *Actavis v Eli Lilly* exceptions to patentability related to uses of human embryos for industrial or commercial purposes *WARF Br stle ISCC* and products resulting from essentially biological processes *Broccoli and Tomatoes II G3 19* Attempts towards convergence in these areas have had mixed results and in some instances fragmentation may be necessary However similar techniques to those applied in the international legal system to respond to fragmentation are being used in the EPS and where this is seen it has been to good effect It is argued that these methods should be recognised structured and promoted to make our response to fragmentation more effective Fragmentation and the European Patent System will be of interest to academics students and practitioners looking for a new perspective on the EPS
