

MEMORANDUM

To: Faculty Council

From: Professor Markus Bussmann
Chair, Engineering Graduate Education Committee

Date: December 9, 2013 for December 11, 2013 Faculty Council Meeting

Re: New Collaborative Program in Engineering Education

REPORT CLASSIFICATION

This is a major policy matter that will be considered by the Executive Committee for endorsing and forwarding to Faculty Council for vote as a regular motion (requiring a simple majority of members present and voting to carry).

SUMMARY

This proposal is for the creation of a collaborative graduate program in engineering education (EngEd) at both the master's and Ph.D. levels. This program will involve units in the Faculty of Applied Science and Engineering (FASE) and the Ontario Institute for Studies in Education (OISE), and be led by FASE.

The program will allow students to explore learning at the nexus of education and engineering practice, focusing the thesis-based research required for their home program in the same area. Topics addressed will span the knowledge base, learning processes, people in engineering programs, surrounding socio-cultural context, and the outcomes that result.

Engineering education research differs from other education research because it considers the distinct aspects of engineering education such as its inherent emphasis on design, quantification, application, systems, constraints, and problem solving. Another distinction is investigation of the broader development of engineers as they acquire their professional identity and competencies.

Like traditional engineering research, research in engineering education can involve the development of innovative tools and technologies. However, it can also focus on understanding better the factors involved in the development of a student from a novice to an engineer, and techniques for improving that educational process.
