Anti-poaching Model for Game Farms and Nature Reserves in the Free State Province of South Africa H.L.

Jordaan,2018 During the last ten years the rhino populations of South Africa have suffered under an intense poaching onslaught This onslaught has moved to the Free State Province of South Africa and there is a justified concern that its rhino populations are at risk To protect the rhinos in the Province a need exists to manage the risk of poaching through a practical rhino anti poaching model which can assist to protect them effectively This Rhino Anti Poaching Model can determine and predict a poaching risk can identify weaknesses can assist to address problem areas and will enable efficient monitoring It is imperative to know which rhino species occurred in the Free State Province in historical times to ensure that the correct rhino species is protected against the risk of poaching and that they be kept in a suitable habitat Nine farms in the Free Sate

have rhino as a prefix in their names which may be an indication that rhino did occur in the Province Various historical photos and literature give a retrospective view and show that there was insufficient browsing vegetation for black rhinos to survive The occurrence of open grassland however suggests that white rhinos did occur in those specific areas during the time of the first pioneers During this study period a count of rhinos was done and currently there are 669 white rhinos and 11 black rhinos in the Province thus a total of 680 rhinos in the Free State Province The South African Constitution mandated the State to enforce measures that will ensure adequate environmental protection for the benefit of future generations The South African government promulgated a myriad of new environmental legislation Several international agreements were also introduced as enforcement tools to regulate rhinos The enforcement measures are noble but out of balance with many inspectors but too few law enforcement officials It also over regulates and ensnare officials in minor issues A brief discussion on the latest technological innovations gives insight to the purpose of its development and effectiveness in combating rhino poaching There are currently no technical or strategic solutions to save rhinos from poaching therefore a combination of techniques is needed Although self manufactured unconventional devices seem to be more efficient to deceive poachers a combination with the latest technological equipment and conventional strategies might be the best solution to counter rhino poaching Free State rhino farmers own 90% of the Province s rhinos However these rhino farmers lack the appropriate security measures required to adequately protect their rhinos A questionnaire was developed and data were collected providing statistics on the current stance of security measures on rhino sites in the Province It showed that 80% of rhino poaching occurs in rhino camps bordering public roads 69% of the rhino sites located within 20km from the nearest town reported poaching and 77% of large rhino camps are prone to poaching incidents 57% of the respondents experienced rhino poaching on their sites Through the questionnaire it was gathered that rhino farmers in the Province are not vested in the concept of using trained rhino security A Production Loss Formula was constructed that calculates the production loss of a poached rhino
