Mongoose IQ 200/1 is a modern car security system, designed and manufactured to meet the following requirements:

- **A high security level.** The system monitors the status of pin switches at the doors, hood and trunk, two two-zone shock sensors and the optional space disturbance. Alarm signals are output to the siren with a power up to 25 W; the car's proper alarm or pager, and the parking lights.
- **Enhanced anti-theft properties** are ensured by a powerful built-in blocking relay and a universal output to organise an extra blocking circuit according to a normally closed as well as normally opened contacts algorithm.
- **A maximal fault-free service life.** The system features a surface mounting technique, an impact-resistant body with a minimal area of service holes (dust- and drip-proof), a non-volatile storage of the controlling chip processor operating mode, and special circuits to protect the system module against interference and overloading.
- **A convenient mounting procedure.** The number of circuits to be connected has been minimised; variable functions of the inputs and outputs add flexibility to the mounting procedure; optional sensors and other equipment can be connected. Built-in relays are used to connect high-current circuits. All connectors are situated on one side of the module.
