Predicting the Dynamics of Research Impact Yannis Manolopoulos, Thanasis Vergoulis, 2021-09-22 This book provides its readers with an introduction to interesting prediction and science dynamics problems in the field of Science of Science Prediction focuses on the forecasting of future performance or impact of an entity either a research article or a scientist and also the prediction of future links in collaboration networks or identifying missing links in citation networks The single chapters are written in a way that help the reader gain a detailed technical understanding of the corresponding subjects the strength and weaknesses of the state of the art approaches for each described problem and the currently open challenges While chapter 1 provides a useful contribution in the theoretical foundations of the fields of scientometrics and science of science chapters 2 4 turn the focal point to the study of factors that affect research impact and its dynamics Chapters 5 7 then focus on article level measures that quantify the current and future impact of scientific articles Next chapters 8 10 investigate subjects relevant to predicting the future impact of individual researchers Finally chapters 11 13 focus on science evolution and dynamics leveraging heterogeneous and interconnected data where the analysis of research topic trends and their evolution has always played a key role in impact prediction approaches and quantitative analyses in the field of bibliometrics Each chapter can be read independently since it includes a detailed description of the problem being investigated along with a thorough discussion and study of the respective state of the art Due to the cross disciplinary character of the Science of Science field the book may be useful to interested readers from a variety of disciplines like information science information retrieval network science informetrics scientometrics and machine learning to name a few The profiles of the readers may also be diverse ranging from researchers and professors in the respective fields to students and developers being curious about the covered subjects *Principles of Scientific Writing and Biomedical Publication* Phil B. Fontanarosa, Annette Flanagan, Philip Greenland, 2024 Publication of biomedical research is essential for improvement and advancement of medical science and clinical practice The history of scientific publication including journals devoted to medical science dates to the 1600s The number of peer reviewed scientific journals is estimated to be in the tens of thousands and the number of journals especially with the increasing creation of open access publications continues to expand Yet despite the long history of and ubiquitous nature of scientific publications the core principles involved in biomedical publication as well as the specific skills of writing and manuscript preparation are not commonly taught in a formal or comprehensive way in medicine public health or research curricula Provided by publisher **The Strategic Marketing of Science, Technology, and Medical Journals** Albert N. Greco, 2023-06-30 This book analyzes the various economic and marketing strategies utilized by the five major STM commercial scholarly journal publishers since 2000 This period has witnessed tremendous economic marketing and technological growth including the migration from a print only to a hybrid publishing format With this growth the industry has also seen the rise of open access publishing copyright challenges by

websites such as Sci Hub the emergence of sharing platforms such as ResearchGate and Academia.edu as well as the impact of Plan S on publishers universities and authors Given this incredible rate of change across the industry the author explores the diverse strategies and structures created by the largest STM publishers to decipher their effectiveness in addressing technological ethical and copyright issues Also he examines how mergers and acquisitions diversified operations such as Elsevier's acquisition of Bepress SSRN and SCOPUS among other platforms Scrutinizing the different managerial marketing technology and economic financial strategies crafted by scholarly journal publishers between 2000-2020 this book offers a comprehensive assessment of the industry's attempts to identify understand cope with and minimize or defeat the Herculean threats to its business model

Handbook of Research on Nascent Entrepreneurship and Creating New Ventures Carrizo Moreira, António, Dantas, José Guilherme Leitão, 2020-10-09 Due to the 2008-2009 crisis the United Nations 2030 agenda for sustainable development and the COVID-19 pandemic the role of entrepreneurship has become more critical in most economies Moreover emerging protectionist policies are further encouraging the emergence of new entrepreneurial projects particularly to replace goods and services traditionally provided by other countries Understanding current challenges and best practices in nascent entrepreneurship is integral for the successful launching of new ventures to support the revitalization of economies and achieve sustainability The Handbook of Research on Nascent Entrepreneurship and Creating New Ventures is a crucial reference source that covers the latest empirical research findings in the field of entrepreneurship and addresses the obstacles entrepreneurs face in these recent challenging times The book embraces a pluralistic perspective from academicians currently navigating nascent entrepreneurship and key concepts for launching successful new ventures Covering topics that include government support programs spin off companies leadership strategic entrepreneurship and crowdfunding this book is targeted towards entrepreneurs professionals academicians researchers and students

Cumulated Index Medicus, 1999 Science Dynamics and Research Production Nikolay K. Vitanov, 2016-08-01 This book deals with methods to evaluate scientific productivity In the book statistical methods deterministic and stochastic models and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research productivity and management of research groups and organizations The dynamics of science structures and systems is complex and the evaluation of research productivity requires a combination of qualitative and quantitative methods and measures The book has three parts The first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size The second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations Part three contains discussions of non-Gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research

productivity The book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the characteristics of research productivity This is not a surprise as scientific systems are nonlinear open and dissipative
