TACCLE2 - e-learning for primary teachers Fernando Albuquerque Costa, Jan Bierweiler, Koen DePryck, Linda Castañeda, Gabriela Grosseck, Carla Rodriguez, Mar Sánchez, Katleen Vanden Driessche, Laura Malita, Isabel Gutiérrez Porlán,, Pedro Reis, Carine Schepers, 2014 TACCLE2 e learning for primary teachers A step by step guide to improving teaching and learning in your classroom is a project funded by the EU under its Lifelong Learning Programme We the authors are real teachers just like you and we ve got the battle scars to prove it Our aim is to help other teachers enhance their current practice by providing support and guidance as they begin bridging the gaps that have until now prevented them from taking advantage of the educational opportunities that information and communication technologies have to offer This handbook contains 38 step by step comprehensive lessons graded according to difficulty and organized according to age group and subject As well as detailed lesson instructions you will also find handy hints and tips to help you avoid any potential pitfalls safety notes so that you can be as confident as possible that learners will use the internet safely and responsibly and a list of loads more ways you can use an applications once you ve mastered it We re such nice people we ve also included links to examples that we ve use links to online tutorials and helpful websites **Poverty and Climate Change** Fitzroy B. Beckford, 2018-09-10 Most if not all of the global biogeochemical cycles on the earth have been broken or

are at dangerous tipping points These broken cycles have expressed themselves in various forms as soil degradation and depletion ocean acidification global warming and climate change The best proposal for an organic solution to fixing the myriad broken cycles is a deliberate investment in solutions that first acknowledge the historic roles played by both the subjugated peoples and the economic beneficiaries of the environmental exploitations of the past Ever since Europeans made contact with the West a series of global circumstances including the genocide of the indigenous people of the Americas the enslavement and global subjugation of Africans and the emergence of Western concepts of trade dominance and capitalism have led to deleterious impacts on the global biogeochemical cycles Addressing the broken biogeochemical cycles should be done with a clear understanding that it was not only human subjects which were subjugated but also land water and air These three global stores must be replenished from the ideological position that poverty is not simply the absence of money but is also the lack of access to non polluting energy sources to clean air devoid of runaway greenhouse gasses and to local conditions devoid of climate change instabilities With this in mind the global powerbrokers can enter into a new deal with developing nations shifting the paradigm toward a new ecological approach that rewards good behavior and sets new standards of worldwide relations based on ecologic inclusivity rather than the exclusive economic arrangements currently in order Harnessing a forward thinking approach to analyzing the current global environmental crisis this book will be of great interest to students and scholars of sustainable development political ecology sustainable agriculture climate change and environmental justice
