A Guide to Detracking Math Courses Angela Torres, Ho Nguyen, Laura Wentworth Streeter, Elizabeth Hull
Barnes, Laura Wentworth, 2023-04-26 Create a pathway to equity by detracking mathematics The tracked mathematics
system has been operating in US schools for decades However research demonstrates negative effects on subgroups of
students by keeping them in a single math track thereby denying them access to rigorous coursework needed for college and
career readiness The journey to change this involves confronting some long standing beliefs and structures in education
When supported with the right structures instructional shifts coalition building and educator training and support the
detracking of mathematics courses can be a primary pathway to equity The ultimate goal is to increase more students access
to and achievement in higher levels of mathematics learning especially for students who are historically marginalized Based
on the stories and lessons learned from the San Francisco Unified School District educators who have talked the talk and
walked the walk this book provides a model for all those involved in taking on detracking efforts from policymakers and
school administrators to math coaches and teachers By sharing stories of real world examples lessons learned and prompts
to provoke discussion about your own context the book walks you through Designing and gaining support for a policy of
detracked math courses Implementing the policy through practical shifts in scheduling curriculum professional development
and coaching Supporting and improving the policy through continuous research monitoring and maintenance This book
offers the big ideas that help you in your own unique journey to advance equity in your school or district s mathematics
education and also provides practical information to help students in a detracked system thrive *The Educational year
