Numeracy and Learning Difficulties Peter Westwood,2016-09-01 Numeracy and Learning Difficulties provides guidance on how to develop flexible teaching methods and strategies to improve mathematical skills of students It discusses common areas of learning difficulty in mathematics and looks at ways teachers can determine gaps in students knowledge as well as how to develop curricula and problem solving strategies to address these gaps *The Trials of Evidence-based Education* Stephen Gorard,Beng Huat See,Nadia Siddiqui,2017-06-26 The Trials of Evidence based Education explores the promise limitations and achievements of evidence based policy and practice as the attention of funders moves from a sole focus on attainment outcomes to political concern about character building and wider educational impacts Providing a detailed look at the pros cons and areas for improvement in evidence based policy and practice this book includes consideration of the following What is involved in a robust evaluation for education The issues in conducting trials and how to assess the trustworthiness of research findings New methods for the design conduct analysis and use of evidence from trials and examining their implications What policy makers head teachers and practitioners can learn from the evidence to inform practice In this well structured and thoughtful text the results and implications of over 20 studies conducted by the authors are combined with a much larger number of studies from their systematic reviews and the implications are spelled out for the research community policy makers schools wanting to run their own evaluations and for practitioners using evidence **An Age of Accountability** John L. Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree Languaging Myths and Realities Qianqian Zhang-Wu,2021-11-15 Higher education institutions in Anglophone countries often rely on standardized English language proficiency exams to assess the linguistic capabilities of their multilingual international students However there is often a mismatch between these scores and the initial experiences of international students in both academic and social contexts Drawing on a digital ethnography of Chinese international students first semester languaging practices this book examines their challenges needs and successes on their initial languaging journeys in higher education It analyzes how they use their rich multilingual and multi modal communicative repertoires to facilitate

languaging across contexts in order to suggest how university support systems might better serve the needs of multilingual international students **The Education of d/Deaf and Hard of Hearing Children** Peter V. Paul, 2020-02-12 A significant number of d/Deaf and hard of hearing d/Dhh children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States and elsewhere To provide an understanding of this issue this book explores the theoretical underpinnings and synthesizes major research findings It also covers critical controversial areas such as the use of assistive hearing devices language and literacy assessments and inclusion Although the targeted population is children and adolescents who are d/Dhh contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as children with language or literacy disabilities and those for whom English is not the home language Collectively this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d/Dhh students It is clear that there is not a one size fits all concept but rather research and instruction should be differentiated to meet the needs of d/Dhh students It is our hope that this book stimulates further theorizing and research and most importantly offers evidence and reason based practices for improving language and literacy abilities of d/Dhh students **Руководство по чтению вслух. Настольная книга для любящих родителей, заботливых бабушек и дедушек и умных воспитателей** Джим Трелиз, Синди Джорджис, 2021-12-16 1979
