Economy, Society, and Education: Learning from the COVID-19 Crisis
Tapas R. Dash, Casey Barnett, 2025-05-29
The global COVID-19 pandemic triggered severe economic shocks that reverberated across the world significantly affecting the lives and livelihoods of millions. Economies were brought to a standstill leading to unprecedented downturns that disrupted growth trajectories and pushed many into poverty. While the magnitude and nature of these impacts varied from country to country, the overall consequences were both immediate and far-reaching. The crisis highlighted the importance of understanding macroeconomic indicators and social dynamics before, during, and after the pandemic to develop informed strategies for economic recovery and resilience. Recognizing the need for deeper insights into these evolving challenges, CamEd Business School convened a series of annual international research symposiums. These forums provided a platform for scholars, researchers, and policymakers to share data-driven insights, critically examine the economic and social impacts of the pandemic, and explore innovative policy solutions. The research-based discussion papers presented at these symposiums formed the foundation of this book. Through rigorous analysis, they offer valuable perspectives on navigating post-pandemic recovery with a focus on evidence-based decision making and long-term resilience. This compilation aims to serve as both a reflection of the pandemic's wide-ranging effects and a guide for rebuilding stronger, more inclusive economies in the years ahead.
