Testing and Modeling of Cellular Materials Derek G Spear, Anthony N Palazotto, 2022-12-30 Testing and Modeling of Cellular Materials discusses the characterization of cellular lattices through quasi static and dynamic testing for use in light weighting or energy absorbing applications Covering cellular materials specifically additively manufactured lattices this book further progresses into dynamic testing and modeling techniques for computational simulations It presents modeling and simulation techniques used for cellular materials and evaluates them against experimental results to illustrate the material response under various conditions The book also includes a case study of high velocity impact that highlights the high strain rate effects on the cellular lattices Features Covers different testing techniques used in quasi static and dynamic material characterization of cellular materials Discusses additive manufacturing techniques for lattice specimen fabrication Analyzes different finite element modeling techniques for quasi static and dynamic loading conditions Presents a comparison and development of a phenomenological material model for use in computational analysis at various loading rates Explores impact stress wave analysis under high velocity loading The book will be useful for researchers and engineers working in the field of materials modeling and mechanics of materials

Recent Advances in Material, Manufacturing, and Machine Learning Bjorn Schuller, Rajeev Gupta, Rakesh Mote, Abhishek Sharma, J.P. Giri, R.B. Chadge, 2024-06-17 The main aim of the 2nd international conference on recent advances in materials manufacturing and machine learning processes 2023 RAMMML 23 is to bring together all interested academic researchers scientists engineers and technocrats and provide a platform for continuous improvement of manufacturing machine learning design and materials engineering research RAMMML 2023 received an overwhelming response with more than 530 full paper submissions After due and careful scrutiny about 120 of them have

been selected for presentation The papers submitted have been reviewed by experts from renowned institutions and subsequently the authors have revised the papers duly incorporating the suggestions of the reviewers This has led to significant improvement in the quality of the contributions Taylor Francis publications CRC Press have agreed to publish the selected proceedings of the conference in their book series of Advances in Mechanical Engineering and Interdisciplinary Sciences This enables fast dissemination of the papers worldwide and increases the scope of visibility for the research contributions of the authors
