Cohen,2012-12-06 Science teachers come in many varieties but they share a common goal to nurture learners Over the past decade we have learned a great deal about how to do this effectively Of all this new and some not so new knowledge what strikes me as most important is that learning occurs best within a context Still as obvious as that may seem it is relatively rare in our high school science classrooms The problem of course is that it is not easy to create a learning experience with hands on relevance to the science under discussion Science teachers in addition to not having the the time for the most part do not have the expertise or readily available resources The solution lies in finding ways to bring scientists into the teaching learning equation Scientists teamed with teachers and their students represent a very real and rich opportunity to involve students in real science as practiced Imagine a research book that gives examples of honest science research experiences for science oriented students What s more imagine a book that includes examples where students are collaborating with scientists from
