Mathamatic November Exam2014 Grd10:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17
Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom. In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms. Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

New Horizon of Psychological Assessment in Education (Penerbit USM) Melissa Ng Lee Yen Abdullah, Lim Hooi Lian, Hairul Nizam Ismail, 2019-08-09
Psychological assessments are used in the field of education to find answers for the questions raised concerning the student's intellectual, academic, social and emotional functioning. The collection, integration and interpretation of all information and data gathered from the assessment will enable better understanding of the student's characteristics and capacities. More effective interventions, recommendations and referrals

can then be implemented This book offers researchers and practitioners insights on assessment concepts and practices that are in line with the demand of education in the 21st century As the new horizon unfolded there is a paradigm shift in assessment moving from macro to micro level of learning from accountability of school to supporting teaching and learning from summative to formative and diagnostics from assessing achievement of individuals to catering of learning needs of diverse learners The new horizon of assessment serves as catalysis for more effective psychological assessment in educational research and practice New Challenges in the Research of Academic Achievement: Measures, Methods, and Results Juan Luis Castejon, José Carlos Núñez, Raquel Gilar-Corbi, Iván Manuel Jorrín Abellán, 2021-02-24 **Motivational development in current educational contexts** Manuel Castro-Sánchez, Ramón Chacón-Cuberos, Lucia Herrera, Guillermo Felipe López Sánchez, 2023-06-06 Annual Report Mpumalanga (South Africa).
