because they continue to rely on the use of calculators for assistance with math The calculator becomes the math problem solving tool Could this be part of the reason students are not performing at levels of proficiency required on standardized test It is important for students to learn basic math skills in its entirety prior to being introduced to the calculator Once students have developed a basic foundation of math skills then and only then should the calculator be introduced as a learning tool When students learn the strategy of Counting Up they will be able to rely on what they have learned to find the solutions to math problems *180 Days of Math for Third Grade, 2nd Edition ebook* Melissa Laughlin,2024-08-01 Strengthen
