International Education Daniel Ness, Chia-Ling Lin, 2015-03-17 This encyclopedia is the most current and exhaustive reference available on international education. It provides thorough up to date coverage of key topics, concepts and issues as well as in depth studies of approximately 180 national educational systems throughout the world. Articles examine education broadly and at all levels from primary grades through higher education, formal to informal education, country studies to global organizations.

International Handbook on Education in Southeast Asia Lorraine Pe Symaco, Martin Hayden, 2021-12-23 This International Handbook provides a detailed account of the education systems of 11 Southeast Asian nations including Brunei Darussalam, Cambodia, Indonesia, Lao People's Democratic Republic, Malaysia, Myanmar, the Philippines, Singapore, Thailand, Timor Leste and Vietnam. It presents a systematic sector by sector explanation of how these national education systems deliver educational services and respond to national and international issues and challenges. With 56 chapters, the International Handbook is the region's most comprehensive educational reference source. In the first of its chapters, the editors introduce the regional context and draw attention to the distinctive characteristics of each of the 11 systems. Southeast Asia, representing 8.5% of the world's population, is as dynamic as it is diverse. The International Handbook charts progress and establishes a benchmark for documenting future developments. It also provides a stepping off point for more detailed investigations of decision making processes and outcomes across the 11 national education systems.

Innovation in Language Learning and Teaching Linh Phung, Hayo Reinders, Vu Phi Ho Pham, 2024-05-22 This book investigates the ways in which new developments in areas of language teaching practice such as policy making, planning, methodology and the use of educational technology are locally adopted, adapted, initiated and implemented in Vietnam and Cambodia. The region is responding to a large number of significant challenges including large scale education reforms, the effects of globalisation and the need for lifelong learning as well as concerns about the quality of its language education system. By looking at the drivers, stakeholders, obstacles and affordances in one particular regional context, the authors examine how processes of change occur. This will help anyone involved in language development from curriculum reform to materials development and from programme evaluation to the setting of assessment standards. The book will be of particular interest to those involved in managing change in language education that attempts to mediate between global trends and local needs as well as students and scholars working in language education, applied linguistics and related fields.

Facing the Khmer Rouge Ronnie Yimsut, 2011-11-08 As a child growing up in Cambodia, Ronnie Yimsut played among the ruins of the Angkor Wat temples surrounded by a close knit community. As the Khmer Rouge gained power and began its genocidal reign of terror, his life became a nightmare. In this stunning memoir, Yimsut describes how in the wake of death and destruction, he decides to live. Escaping the turmoil of Cambodia, he makes a perilous journey through the jungle into Thailand, only to be sent to a notorious Thai prison. Fortunately, he is able to reach a refugee camp and ultimately migrate to the United States.

where he attended the University of Oregon and became an influential leader in the community of Cambodian immigrants Facing the Khmer Rouge shows Ronnie Yimsut s personal quest to rehabilitate himself make a new life in America and then return to Cambodia to help rebuild the land of his birth Cambodia Asian Development Bank,1996 *Education in Cambodia* Vincent McNamara,Martin Hayden,2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars The book focuses on how the system has developed and is making progress Significant achievements over the past two decades are evident but many problems remain including the poor quality of teaching research and institutional management Under funding is an ongoing obstacle but so too is a bureaucratic culture of resistance to change a history of weak governance and an anti reform sentiment deriving from a teacher centred and exam driven curriculum Achieving international standards must now be the system s highest priority To this end the system must rid itself of conservatism complacency and manipulation by parochial vested interests **Globalization, International Education Policy and Local Policy Formation** Carolyn A. Brown,2014-10-13 This edited volume focuses on how international education policy set by international policymakers and donors influences local education policy in developing countries The book s primary purpose is to give voice to scholars from developing countries and regions around the world by inviting them to explore how the international policy invariably linked to international aid influences education policy formation and implementation in their country or region and how this influence does or does not meet the local cultural social economic and political needs A relatively recent and small body of research and commentary supports a discourse that questions how well international education policy mandates such as Education For All serve the needs of developing countries The intent of this book is to advance this discourse by giving voice to local scholars who observe and study the donor process The book will be divided into two sections the first section will set the stage for the discussions in the second section by providing theoretical and historical context for international education policy As a framework for understanding the book adopts the position that international policy does not have either the ability or the intent to serve the widely diverse needs of development around the world International education policy has been formed historically by wealthy nations and agencies dominated by Western theoretical paradigms In recent years donor countries have made an effort to collaborate with developing countries in developing international education policy goals however this collaboration has been limited Following establishment of the context of international education policy section II of the book provides a forum for scholars from around the world to openly discuss and critique the impact of international policy on education in their country or region **Proposed Asian Development Fund Grant, Kingdom of Cambodia** Asian Development Bank,2007 **Handbook for Teaching Khmer-speaking Students** ,1988 Khmer Monk Education in the Thai Border Camps Peter Gyallay-Pap,1990 This is a study on the current conditions of monk education in Khmer refugee camps and the role of

Buddhism in the psychological survival of refugees The study begins with background information on the role of Buddhism as a centering force in rural Khmer society The author notes that Buddhism was a primary target for destruction by the Khmer Rouge regime between 1975 and 1979 He examines the situation of education in the border camps giving special attention to the organization of the religious life within the camps and the communication between the monks in the major camps The daily schedules of the monks are presented as well as the curriculum and quality of the monks education within the camps Various international efforts to improve the educational situation for the monks are described In addition the study examines the lay devotee nuns The author goes on to discuss the specific situation of the monk education problem in the three major camps Site 2 Site B and Site 8 The study concludes that international support for Khmer Buddhist Sangha in the border camps has become increasingly recognized as a way of addressing the psychological and social problems of the displaced Khmer The appendices include statistics on the Khmer Buddhist Wats in the Thai Border camps in April May 1990 a report of the programme activities and proposals developed by the Khmer Buddhist Educational Assistance Project KEAP with and on behalf of the Khmer Buddhist monks in the Thai border camps an English summary of Ven Hok Savann s three talks to Khmer monks and novices at the University of Massachusetts in January 1990 a background paper providing an overview of the history of Buddhism in Kampuchea a selected bibliography in Western languages of Buddhism in Kampuchean and South East Asian culture and politics
