*Units of Study for Teaching Writing* Lucy Calkins, 2006. This series of books is designed to help upper elementary teachers teach a rigorous yearlong writing curriculum. *The Power of Story* Joan Wink Ph.D., 2017-11-07. Through this book readers will discover that stories can move the human heart and head in ways that research cannot. Stories bring together readers writers librarians teachers students and families in the libraries of today and will continue to do so tomorrow. Written for all those lovers of literacy this book links libraries and literacies through the power of stories. The book is not filled with data in the form of pie charts graphs and tables. Rather the truth of the research is grounded in authentic stories that reflect not only the interpretation of data but also the transformative nature of literacies and libraries. The author's primary goal is that readers will come to value and use storytelling in their own professional and personal lives to explain and expand on complex concepts and to make information more accessible for all. The book begins by presenting anecdotes and the author's personal story to lay the foundation for what literacies are and what literacy is not. An activity Spiral of Literacy allows readers to reflect on their own literacies. Chapters that follow each begin with a story that sets the theoretical foundation. Each chapter concludes with an action section that demonstrates how to turn theory to practice whether you are in a library a classroom or at home. A final chapter envisions what libraries might look like in 10 years through interviews with librarians teachers and others interested in literacy. **Evaluating Children's Writing** Suzanne Bratcher, 2004. An introduction to and explanation of a wide range of specific evaluation strategies used by classroom teachers to arrive at grades for children's writing giving

explicit instructions for implementing them. Samples of student writing accompany the instructions to illustrate the techniques and an appendix of additional student writing is provided to allow readers to practice particular evaluation strategies. More than just a catalogue of grading options, however, this is a handbook with a point of view. Its purpose is to help teachers become intentional about their grading practices. Along with recipes for grading techniques, it offers a philosophy of evaluating student writing that encourages teachers to put grading into a communication context and to make choices among the many options available by determining the instructional purpose of the assignment and considering the advantages and disadvantages of particular grading strategies. Specific grading techniques are integrated with suggestions about the craft of evaluation, guidelines for instructional objectives for student audience analysis and for teacher self analysis that help define communication contexts.
