things happen As Harvard lecturer and global trend watcher Vikram Mansharamani shows in this eye opening and perspective shifting book our complex data flooded world has made us ever more reliant on experts protocols and technology Too often we ve stopped thinking for ourselves With stark and compelling examples drawn from business sports and everyday life Mansharamani illustrates how in a very real sense we have outsourced our thinking to a troubling degree relinquishing our autonomy Of course experts protocols and computer based systems are essential to helping us make informed decisions What we need is a new approach for integrating these information sources more effectively harnessing the value they provide without undermining our ability to think for ourselves The author provides principles and techniques for doing just that empowering readers with a more critical and nuanced approach to making decisions Think for Yourself is an indispensable guide for those looking to restore self reliant thinking in a data driven and technology dependent yet overwhelmingly uncertain world
