

Warning: Only use commercially available gun solvent and gun oil or a cleaner-lubricant-preservative. Use of improper cleaning fluids could damage the PRS7 and void the warranty.

1. Disassemble the PRS7 (see Disassembly).

2. Thoroughly clean all exterior areas of the slide and receiver with solvent and brush.

3. Brush the barrel bore and chamber with a good powder removing solvent and bore brush. Wipe the areas clean with patches or a swab.

4. Using a small brush dipped in solvent, remove all deposits from around the breech of the barrel as well as all adjacent areas that have been subjected to powder or primer residue.

5. Clean the integral magazine area with solvent and brush if needed.

Lubrication

After cleaning the entire gun, use a cloth to apply a light coating of high-quality gun oil to all interior and exterior metal surfaces and wipe clean. It is recommended to brush a thin coating and manually cycle the slide back and forth to check the function of the firearm. If any parts are damaged, badly worn, or the firearm does not work correctly, the firearm should not be fired and should be returned to K&T for service immediately.

Warning: Discharging a firearm with oil, grease, or any other material even partially obstructing the bore could result in serious injury, damage to your firearm, and death.

C. Troubleshooting

Proper functioning of your firearm is directly related to proper maintenance and care, as well as the quality of ammunition you use. If in the unlikely circumstance your PRS7 malfunctions, we have included a list of several suggested remedies below.

Failure to Fire (FTFR):

Also known as a dud or misfire. This occurs when the round feeds correctly in the chamber, the trigger is pulled, but the primer in the round is not discharged. Point the barrel of the PRS7 in a safe direction. For either scenario, wait at least 1 minute prior to clearing the firearm.

- After waiting 1 minute, eject the dud round and set aside. Then, proceed to fire as normal. Fire one round to see if the failure repeats. If the failure does not repeat, fire a couple more, and if they are without failure, the FTFR round that was set aside is a faulty round and should be **disposed of properly**. If the FTFR continues to occur with successive rounds, then it is likely that a thorough cleaning is required to ensure proper contact between the firing pin and cartridge.

Failure to Feed (FTFC):

This type of failure occurs when the cartridge does not fully seat in the chamber.

- It is most likely that the chamber, feed ramp, recoil spring and/or the magazine/spring need to be cleaned. Properly clean and lubricate the pistol.
- Some pistols may have trouble firing lighter weight 5.7 x 28mm ammunition, specifically those with 27 grain bullets.

Failure to Eject (FTEJ):

When an empty cartridge leaves the chamber, but does not fully exit the pistol, it is a FTEJ.

- Push back the slide to the locked position. The cartridge should eject and a new round should be able to enter the chamber. Proceed to fire and see if the problem repeats. If so, the chamber and slide may need to be cleaned.

Failure to Extract (FTEX):

This failure occurs when the spent cartridge is not removed from the chamber.

- A faulty round could expand and get stuck in the chamber. The barrel could also be dirty and require cleaning. Additionally, check the extractor for visible damage and make sure that the spring is working.

In the case of malfunctions beyond the scope of the stated failures, contact K&T for service at www.kaltecweapons.com/contact.
