from the radios used by organizations These radios can include two way radios used by guards wireless headsets cordless
phones and wireless cameras Wireless Reconnaissance in Penetration Testing describes the many ways that a penetration
tester can gather and apply the information available from radio traffic Stopping attacks means thinking like an attacker and
understanding all the ways that attackers gather information or in industry terms profile specific targets With information
from what equipment to use and how to find frequency information to tips for reducing radio information leakage to actual
case studies describing how this information can be used to attack computer systems this book is the go to resource for
penetration testing and radio profiling Author Matthew Neely is a respected and well known expert and speaker on radio
reconnaissance and penetration testing Includes real world case studies of actual penetration tests using radio profiling

The Doctor Who Wasn't There Jeremy A. Greene,2022-10-26 This gripping history shows how the electronic devices we
use to access care influence the kind of care we receive The Doctor Who Wasn't There traces the long arc of enthusiasm for
and skepticism of electronic media in health and medicine Over the past century a series of new technologies promised to
democratize access to healthcare From the humble telephone to the connected smartphone from FM radio to wireless
wearables from cable television to the electronic brains of networked mainframe computers each new platform has promised
a radical reformation of the healthcare landscape With equal attention to the history of technology the history of medicine
and the politics and economies of American healthcare physician and historian Jeremy A Greene explores the role that
electronic media play for better and for worse in the past present and future of our health Today's telehealth devices are far
more sophisticated than the hook and ringer telephones of the 1920s the radios that broadcasted health data in the 1940s the
closed circuit televisions that enabled telemedicine in the 1950s or the online systems that created electronic medical

records in the 1960s But the ethical economic and logistical concerns they raise are prefigured in the past as are the gaps between what was promised and what was delivered Each of these platforms also produced subtle transformations in health and healthcare that we have learned to forget displaced by promises of ever newer forms of communication that took their place Illuminating the social and technical contexts in which electronic medicine has been conceived and put into practice Greene s history shows the urgent stakes then and now for those who would seek in new media the means to build a more equitable future for American healthcare *Proceedings of the Board of Supervisors of Cayuga County at Special, Regular and Annual Sessions* Cayuga County, N.Y.
