Nordic Narratives of Nature and the Environment Reinhard Hennig, Anna-Karin Jonasson, Peter Degerman, 2020-07-06 Many contemporary environmental risks and global environmental changes occurring today are unprecedented in the history of human life on earth. However, the images and narratives through which humans relate to these phenomena are built on existing cultural tropes and narrative models. Cultural, social, and historical contexts strongly influence how we construct images and narratives of nature and the environment. It is therefore highly important to study such narratives in works of literature, film, and other forms of cultural expression in relation to the specific circumstances from which they arise. *Nordic Narratives of Nature and the Environment* is the first English language anthology that presents ecocritical research on northern European literatures and cultures. The contributors examine specifically Nordic narratives of nature and the environment with a focus on the cultures and literatures of the modern northern European countries: Denmark, Finland, Norway, and Sweden, including Sápmi, which is the land traditionally inhabited by the indigenous Sami people. Covering northern European literatures and cultures over a period of more than two centuries, this anthology provides substantial insights into both old and new narratives of nature and the environment, as well as intertextual relations, the variety of cultural traditions, and current discourses connected to the Nordic environmental imagination. Case studies relating to works of literature, film, and other media shed new light on the role of culture, history, and society in the formation of narratives of nature and the environment and offer a comprehensive and multi-faceted overview of the most recent ecocritical research in Scandinavian studies.

Nordic Speculative Fiction Jyrki Korpua, Aino-Kaisa Koistinen, Hanna-Riikka Roine, Marta Mboka Tveit, 2024-12-20 This volume brings together scholarly theories and practices on speculative fiction from the Nordic countries, including Denmark, Finland, Iceland, Norway, and Sweden, that are all rooted in similar values, culture, and history, yet are independent and unique societies. The book exhibits both the convergences and the diversity of the Nordics in fiction and fandom, as well as in research. It traces the roots of Nordic speculative fiction, how it has developed over time, and how the changes in Nordic environments and societies caused by overarching shared global issues, such as climate change, mass migration, and technological acceleration, find space in speculative practices. The first of its kind, this book allows for deeper insights into the unique characteristics that make Nordic literature and art recognisable and allows for a better understanding of the place of the Nordics within wider global culture systems. The chapters range from literary critiques, film, and television studies, creative works by three Nordic creative writers, transcultural text comparisons, and contributions on speculative art to theoretical and methodological discussions on fandom, worldbuilding, and semantics. Part of the *Studies in Global Genre Fiction* series, this book contributes to connecting Nordic speculative fiction scholarship to the wider global community within the field. It will be of interest to scholars and general enthusiasts of speculative fiction and those with interest in Nordic fiction, film, and television studies, literary culture, or media studies, comparative literature, and cultural
