since early 2011 as several surrounding Arab countries have experienced political upheaval Israel has shown particular concern about threats from Hezbollah and other non state groups in ungoverned or minimally governed areas in Syria Lebanon and Egypt s Sinai Peninsula as well as from Hamas and other Palestinian militants in the Gaza Strip Recent exploitation of offshore natural gas raise the prospect of a more energy independent future Israel s demographic profile has evolved in a way that appears to be affecting its political orientation with various leaders vying for the public s support by interweaving ideology with ethnic religious socioeconomic and national security considerations *Israel* Jim Zanotti,2020

Foreign Aid in the Middle East Beáta Paragi, 2019-02-28 What do we mean by gifts in International Relations Can foreign aid be conceptualized as a gift Most foreign aid transactions are unilateral and financially unreciprocated yet donors expect to benefit from them Previous research dealing with foreign aid has analyzed the main donor motives and interests in providing financial support This book offers an in depth analysis of the invisible political or social exchange taking place between recipient countries and donors when a grant agreement is signed Focusing on Egypt Jordan Palestine and Israel the main beneficiaries of Western foreign aid the book uses gift theories and theories of social exchange to show how international social bonds are shaped by foreign aid and in what ways recipient countries are obliged to return the gift they receive Foreign aid is a means of buying stability or democracy in the region but Beata Paragi is interested here to understand the actual feasibility of Western assistance Looking at the context of the Arab Spring the book examines how aid impacts on a recipient country s domestic political events such as war the quest for self determination the struggle against occupation and the fight for dignity An original contribution to Middle East Studies and International Relations the research presents an alternative interpretation of foreign aid and show how external funds interact with local developments and realities

**Proliferation** Brian K. Chappell,2021-01-07 Contemporary fears of rogue state nuclear proliferation and nuclear terrorism pose unique challenges for the global community This book offers a unique approach by examining why states that have the military capability to severely damage a proliferating state s nuclear program instead choose to pursue coercive diplomacy The author argues cognitive psychological influences including the trauma derived from national tragedies like the September 11th attacks and the Holocaust and a history of armed conflict increase the threat perceptions of foreign policy decision makers when confronting a state perceived to be challenging the existing power structure by pursuing a nuclear weapon The powerful state s degree of perceived threat combined with its national security policies military power projection capabilities and public support then influence whether it will take no action use coercive diplomacy sanctions or employ military force to address the weaker state s nuclear ambitions
